

Navigating Through the Test

During this test, you can use the mouse OR the keyboard to move through the screens.

You can use the following standard keys on the keyboard:

Tab 

Press the Tab key to move from one selectable element on the page to the next. The current selectable element will be indicated by a thin blue border.

Examples of selectable elements:

- Buttons on the menu toolbar
- Answer options for test questions

Shift  and Tab 

Press the Shift and Tab keys to reverse direction through the selectable elements.

Spacebar 

Press the spacebar key to select an element. Press the spacebar key again to deselect the element.

Up  and Down 

Use the up and down arrows to scroll vertically.

Select **Continue** to proceed.

having test questions or answers in advance of the test administration and bringing preknowledge of test information into the test center in any form including, but not limited to, identification documents, prohibited devices and any other method listed as an aid in connection to the test.

- Using or having any prohibited device (e.g., phones, PDAs, all watches, including digital, analog and smartwatches, and other electronic, recording, listening, scanning or photographic devices) in your possession during the test administration, including during breaks
- Using any aids in connection with the test, including, without limitation: mechanical pencils, mechanical erasers, pens, pagers, beepers, all watches, including digital, analog and smartwatches, books, pamphlets, notes, unauthorized scratch paper, rulers, highlighter pens, scan pens or scanning devices, dictionaries, translators, compasses, protractors and any handheld electronic scanning, listening, recording or photographic devices
- Creating a disturbance or disruptive behavior in any form will not be tolerated. The test administrator has sole discretion in determining what constitutes disruptive behavior.
- Attempting to give or receive assistance or communication in any form is not permitted during the test administration. Discussion or sharing of test content or answers during the test administration, including breaks, and after the test administration, is prohibited.
- Removing or attempting to remove test content from the test center. Under no circumstances may test content or any part of the test content be removed, reproduced and/or disclosed by any means (e.g., hard copy, verbally, electronically) to any person or entity.
- Tampering with a computer during a computer-delivered test administration
- Attempting to remove scratch paper (either partially or in its entirety) from the computer-delivered testing room or using scratch paper before the test, during untimed sections of the test or during breaks
- Bringing food, beverages or tobacco into the testing room
- Bringing a weapon or firearm into the test center
- Leaving the test center vicinity during the test session or during breaks
- Leaving the testing room without permission. You are not permitted to go outside the test center building

Verbal Reasoning

12 Questions

18 minutes (standard time)

For each question, indicate the best answer using the directions given. If you need more detailed directions, select **Help** at any time.

If a question has answer choices with **ovals** ☐, then the correct answer consists of a single choice. If a question has answer choices with **square boxes** ☐, then the correct answer consists of one or more answer choices. Read the directions for each question carefully. The directions will indicate if you should select one or more answer choices. To answer questions based on a reading passage, you may need to scroll to read the entire passage. You may also use your keyboard to navigate through the passage.

Select **Continue** to proceed.

Select one entry for the blank. Fill the blank in the way that best completes the text.

The video game company claims that it is in the entertainment business, which implies accessibility and ease but also suggests _____, and thus does a disservice to those who play video games: you take in entertainment but you actively participate in play.

luxury
pleasure
banality
passivity
shoddiness

Select one answer choice.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Scientists once said that cosmology was the field where the ratio of theory to data was (i)_____ : there was an abundance of theories, but almost no data. Recently, however, that ratio has flipped. A huge and ever-increasing amount of data has (ii)_____ all theories but one.

Blank (i)	Blank (ii)
largely unknown	eliminated
nearly infinite	supported
highly variable	clarified

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

For Plato the art of music was so (i)_____ moral and political reality that any alteration to the musical system would necessarily require a corresponding political shift. But two and a half millennia later, when classical music is generally seen merely as a lifestyle accessory, Plato’ s conception seems (ii)_____. To be sure, there are still people who consider classical music to be of (iii)_____ cultural importance, but few of them are able to articulate this convincingly.

Blank (i)	Blank (ii)	Blank (iii)
rarely identified with	apt	marginal
tenuously connected to	absurd	profound
firmly anchored in	disingenuous	uncertain

Select one entry from each column.

Questions 4 and 5 are based on this passage.

How well is industry doing at recycling metals? One metric sometimes used for answering the question is recycled content, which describes the share of scrap metal in overall production and is important in getting a sense of the magnitude of secondary supply. However, recycled content does not distinguish between new (yield loss from fabrication and manufacturing) and old (postconsumer) scrap as input material, making it vulnerable to artificially increased rates based solely on preconsumer sources. That is, a focus on recycled content may give fabricators incentives to increase their scrap output to meet secondary demand, inadvertently promoting inefficiencies in fabrication and manufacturing. What primarily needs to be encouraged is, instead, the collection and processing of old scrap for recycling.

It can be inferred from the passage that a rise in the recycled content of industrial production

- ☐ does not necessarily indicate that the proportion of scrap in overall production is higher
- ☐ does not necessarily reflect an increase in the recycling of scrapped metal-containing products
- ☐ indicates that fabricators no longer need incentives to use scrap as input material
- ☐ indicates that fabricators are actively promoting the use of postconsumer scrap as input material
- ☐ indicates that fabricators are decreasing their yield loss despite greater secondary demand

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Although its director _____ that the movie uses a documentary approach in portraying the famous sit-down strike, in practice its characters are heavily fictionalized and fall into familiar Hollywood types.

- ☐ asserts
- ☐ concedes
- ☐ guarantees
- ☐ disputes
- ☐ grants
- ☐ maintains

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Evidence of the human brain' s _____ abounds: violinists, for example, tend to have larger cortical areas devoted to processing signals from their fingering hands than do non-violinists.

- ☐ synchronicity
- ☐ flexibility
- ☐ complexity
- ☐ malleability
- ☐ vulnerability
- ☐ sensitivity

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

It is an ironic reversal that just those politicians who most vociferously lambasted the distorting complexities of the country's tax system are now the ones _____ an agreement that worsens the mess.

- ☐ espousing
- ☐ discounting
- ☐ eschewing
- ☐ championing
- ☐ negotiating
- ☐ ignoring

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Whether the film is _____ adaptation of the legend is debatable: the author of the screenplay claims that it was based on the original tale, but admits taking some interpretive license with the story.

- ☐ an inspired
- ☐ a rigorous
- ☐ an unsentimental
- ☐ a successful
- ☒ a sober
- ☐ a faithful

Select two answer choices.

Questions 10 - 12 are based on this passage.

The idea of religious music as being the artistically purest form of Black musical expression has deep roots: W. E. B. Du Bois, James Weldon Johnson, and Alain Locke are just a few prominent intellectuals who held the spirituals to be the pinnacle of Black art in the United States during the first part of the twentieth century, with Du Bois describing them as “the most beautiful expression of human experience, born this side of the seas . . . the singular spiritual heritage of the nation and the greatest gift of the Negro people.”

The elevation of religious music to the epitome of authentic Black musicality speaks to a broader tendency noted by Karl Hagstrom Miller: the urge for critics and historians to describe Black music making in terms that are inherently *collective*. This has extended to nonmusical contexts, in which the call-and-response dynamic, the “ring shout,” and jazz-derived metaphors of collective interaction have been highly influential in discussions of African American culture generally. While certainly useful, Miller points out that the abundance of metaphors about music making as a collective experience “has a tendency to trap individuals within a racial collectivity, naturalizing music as an outgrowth of one’s life rather than a cultivated talent and obscuring the meaning and uses of art that falls outside of racially defined cultural borders.” In other words, individuating traits such as technique, ambition, and stylistic diversity become subordinated to one’s role within a group and his or her imagined obligations to that group.

The author of the passage quotes Du Bois most likely to

- ☐ clarify an aesthetic principle that has been difficult to comprehend
- ☐ establish the actual source of a frequently misattributed argument
- ☐ evoke a sense of the cultural authority associated with a particular view
- ☐ compare Du Bois’ definition of a term to Miller’s definition of that term
- ☐ distinguish Du Bois’ position from those of Johnson and Locke

Questions 10 - 12 are based on this passage.

The idea of religious music as being the artistically purest form of Black musical expression has deep roots: W. E. B. Du Bois, James Weldon Johnson, and Alain Locke are just a few prominent intellectuals who held the spirituals to be the pinnacle of Black art in the United States during the first part of the twentieth century, with Du Bois describing them as “the most beautiful expression of human experience, born this side of the seas . . . the singular spiritual heritage of the nation and the greatest gift of the Negro people.”

The elevation of religious music to the epitome of authentic Black musicality speaks to a broader tendency noted by Karl Hagstrom Miller: the urge for critics and historians to describe Black music making in terms that are inherently *collective*. This has extended to nonmusical contexts, in which the call-and-response dynamic, the “ring shout,” and jazz-derived metaphors of collective interaction have been highly influential in discussions of African American culture generally. While certainly useful, Miller points out that the abundance of metaphors about music making as a collective experience “has a tendency to trap individuals within a racial collectivity, naturalizing music as an outgrowth of one’s life rather than a cultivated talent and obscuring the meaning and uses of art that falls outside of racially defined cultural borders.” In other words, individuating traits such as technique, ambition, and stylistic diversity become subordinated to one’s role within a group and his or her imagined obligations to that group.

Consider each of the choices separately and select all that apply.

The passage suggests that “metaphors about music making as a collective experience” may lead critics to

- ☐ perceive Black musicians as having an important responsibility to members of the Black community
- ☐ overlook the diligence and intentionality of Black musicians in pursuing their art
- ☐ praise Black musicians in terms that ultimately fail to acknowledge the impact of individual artists

For each question, indicate the best answer, using the directions given. If you need more detailed directions, select **Help** at any time.

An on-screen calculator is available for each question in this section. To use the calculator, select the calculator button.

If a question has answer choices with **ovals** ☐, then the correct answer consists of a single choice. If a question has answer choices with **square boxes** ☐, then the correct answer consists of one or more answer choices. Read the directions for each question carefully. The directions will indicate if you should select one or more answer choices. To answer questions based on a data presentation, you may need to scroll or use your keyboard to access the entire presentation.

All numbers used are real numbers.

All figures are assumed to lie in a plane unless otherwise indicated.

Geometric figures, such as lines, circles, triangles, and quadrilaterals, **are not necessarily** drawn to scale. That is, you should **not** assume that quantities such as lengths and angle measures are as they appear in a figure. You should assume, however, that lines shown as straight are actually straight, points on a line are in the order shown, and more generally, all geometric objects are in the relative positions shown. For questions with geometric figures, you should base your answers on geometric reasoning, not on estimating or comparing quantities by sight or by measurement.

Coordinate systems, such as xy -planes and number lines, **are** drawn to scale; therefore you can read, estimate, or compare quantities in such figures by sight or by measurement.

Graphical data presentations, such as bar graphs, circle graphs, and line graphs, **are** drawn to scale; therefore, you can read, estimate, or compare data values by sight or by measurement.

Select **Continue** to proceed.

Questions 5 and 6 are based on this passage.

Despite today's more efficient electrical generators, modern electric-only power plants waste more of their fuel sources' potential energy than did Thomas Edison's power plants of the late 1800s. Edison used cast-off steam from his generators to warm nearby homes and factories. But few modern power plants use this residual heat, instead venting it into the air. When newer, larger plants required more real estate, they were built farther from customers. Moreover, because electricity travels easily, plants were located wherever they could tap the energy of a river or where local coal was especially cheap. The heat generated during the production of electricity does not travel far, however, so when power plants moved out to the horizon, the steam went to waste.

It can be inferred from the passage that, in general, locating modern power plants closer to population centers would have

- ☐ compromised efforts to conserve energy in populated areas
- ☐ decreased the demand for heating within those population centers
- ☐ resulted in higher costs for the fuel used by those plants
- ☐ required much larger plants than those currently operating
- ☐ obliged power companies to find an alternative to coal as a fuel source

Select one answer

15...84正在远程本机

Questions 5 and 6 are based on this passage.

Despite today's more efficient electrical generators, modern electric-only power plants waste more of their fuel sources' potential energy than did Thomas Edison's power plants of the late 1800s. Edison used cast-off steam from his generators to warm nearby homes and factories. But few modern power plants use this residual heat, instead venting it into the air. When newer, larger plants required more real estate, they were built farther from customers. Moreover, because electricity travels easily, plants were located wherever they could tap the energy of a river or where local coal was especially cheap. The heat generated during the production of electricity does not travel far, however, so when power plants moved out to the horizon, the steam went to waste.

The author suggests that steam generated by modern power plants is not used for heating because

- ☐ steam generally proves incompatible with most modern industrial needs
- ☐ other means of heating have become more cost-effective
- ☐ steam is no longer produced in sufficient quantities to be useful
- ☐ insufficient demand for heating exists nearby
- ☐ transporting steam long distances would prove to be prohibitively expensive

Questions 7 to 9 are based on this passage.

Buell's study of village sketches (a type of fiction popular in the United States in the 1830s and 1840s) provides a valuable summary of sketches that portray the community as homogeneous and fixed, but it ignores those by women writers, which typically depicted the diversity that increasingly characterized actual village communities at that time. These women's geographical mobility was restricted (although women writers of the time were not uniformly circumscribed in this way), and their subject matter reflected this fact. Yet their texts were enriched by what Gilligan, writing in a different context, has called the ability to attend to voices other than one's own. To varying degrees, the women's sketches portray differences among community members: all stress differences among men and among women (particularly the latter) as well as differences between the sexes, and some also depict cultural diversity. These writers represent community as dynamic, as something that must be negotiated and renegotiated because of its members' divergent histories, positions, expectations, and beliefs.

Consider each of the choices separately and select all that apply.

According to the passage, village sketches written by women in the United States in the 1830s and 1840s typically reflected

- ☐ the negotiations that characterized trade relationships between villages
- ☐ the fact that these women did not often travel very far beyond their own village
- ☐ the plurality of experiences and ideas that existed among the residents of a village

Questions 7 to 9 are based on this passage.

Buell's study of village sketches (a type of fiction popular in the United States in the 1830s and 1840s) provides a valuable summary of sketches that portray the community as homogeneous and fixed, but it ignores those by women writers, which typically depicted the diversity that increasingly characterized actual village communities at that time. Question 13 is based on this passage.

When armyworm caterpillars feed on maize plants, the caterpillars are often attacked by a certain species of wasp. Armyworm caterpillars that are present on a maize plant but have not fed on it are not attacked by the wasps, which are attracted by a chemical signal released by the injured maize plants. It is likely that the trigger for the release of this signal is in the oral secretions the caterpillars produce while feeding, since _____.

Which of the following most logically completes the argument?

- ☐ armyworm caterpillars feeding on plants other than maize are seldom attacked by wasps
- ☐ a caterpillar must actually start producing these oral secretions before it can begin feeding on a maize plant
- ☐ caterpillars that have been feeding on a maize plant are a richer source of nutrients for predators than are caterpillars that have not been feeding on a maize plant
- ☐ the wasps do not come to maize plants if the only damage to the plants is mechanical damage deliberately caused by experimenters
- ☐ large numbers of the wasps arrive whenever the chemical signal is produced artificially near maize plants

Questions 14 and 15 are based on this passage.

When studying shrimp feeding from hydrothermal vents at the bottom of the ocean, biologists were surprised that the shrimp's reproductive cycles followed seasonal patterns. Far beyond the reach of sunlight, and with food abundant around the vents all year round, why should such animals reproduce seasonally? The answer might involve their offspring, which in their larval form drift in the currents to colonize new vents. The larvae must feed during their trip, and their springtime release coincides with a peak in algae raining down from surface waters. So far, researchers have found no evidence of seasonal breeding among vent-dwelling species that provide their offspring with yolk to sustain them or among vent-dwelling species found in areas of the ocean with no seasonal algae blooms.

Which of the following best describes the function of the highlighted sentence?

- ☐ It casts doubt on the accuracy of earlier observations of seasonal breeding among shrimp species living near hydrothermal vents.
- ☐ It undermines the explanation proposed for seasonal breeding among some shrimp species living near hydrothermal vents.
- ☐ It suggests that alternative theories are needed to explain seasonal breeding among shrimp species living near hydrothermal vents.
- ☐ It describes the survival benefits to shrimp of mating in parts of the ocean where algae blooms rain down abundantly.
- ☐ It supports the explanation proffered for the seasonal breeding observed among some shrimp species living near hydrothermal vents.

Although people sometimes conflate them, the Beat poetry scene and the folk-music revival were actually (i)_____ and in many ways (ii)_____, despite sharing certain ancestral connections in Depression-era left-wing politics.

Blank (i)	Blank (ii)
distinct	reactionary
influential	inspired
marginal	antagonistic

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Whereas classic compromises express an underlying and continuing (i)_____ of values, so that the disagreements among the parties are embodied in the compromise itself, consensual compromises are based on an underlying (ii)_____ of values.

Blank (i)	Blank (ii)
conflict	lack
coherence	intersection
conflation	acceptance

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Several times in this crime series, the police chief presumes herself to be (i)_____, only to learn that, on the contrary, her role is that of(ii)_____: it requires her to (iii)_____ the wishes of her political bosses, who want to hide whatever malfeasance has paralyzed the local police department. At first willing to reconcile herself to the imposture, she is eventually impelled to rebel by her innate sense of justice and her formidable skills as a gumshoe.

Blank (i)	Blank (ii)	Blank (iii)
innocent	a suspect	deviate from
autonomous	a figurehead	conform to
discredited	an expert	criticize

Select one entry from each column.

Questions 5 and 6 are based on this passage.

Despite today's more efficient electrical generators, modern electric-only power plants waste more of their fuel sources' potential energy than did Thomas Edison's power plants of the late 1800s. Edison used cast-off steam from his generators to warm nearby homes and factories. But few modern power plants use this residual heat, instead venting it into the air. When newer, larger plants required more real estate, they were built farther from customers. Moreover, because electricity travels easily, plants were located wherever they could tap the energy of a river or where local coal was especially cheap. The heat generated during the production of electricity does not travel far, however, so when power plants moved out to the horizon, the steam went to waste.

It can be inferred from the passage that, in general, locating modern power plants closer to population centers would have

- ☐ compromised efforts to conserve energy in populated areas
- ☐ decreased the demand for heating within those population centers
- ☐ resulted in higher costs for the fuel used by those plants
- ☐ required much larger plants than those currently operating
- ☐ obliged power companies to find an alternative to coal as a fuel source

Questions 5 and 6 are based on this passage.

Despite today's more efficient electrical generators, modern electric-only power plants waste more of their fuel sources' potential energy than did Thomas Edison's power plants of the late 1800s. Edison used cast-off steam from his generators to warm nearby homes and factories. But few modern power plants use this residual heat, instead venting it into the air. When newer, larger plants required more real estate, they were built farther from customers. Moreover, because electricity travels easily, plants were located wherever they could tap the energy of a river or where local coal was especially cheap. The heat generated during the production of electricity does not travel far, however, so when power plants moved out to the horizon, the steam went to waste.

The author suggests that steam generated by modern power plants is not used for heating because

- ☐ steam generally proves incompatible with most modern industrial needs
- ☐ other means of heating have become more cost-effective
- ☐ steam is no longer produced in sufficient quantities to be useful
- ☐ insufficient demand for heating exists nearby
- ☐ transporting steam long distances would prove to be prohibitively expensive

Questions 7 to 9 are based on this passage.

Buell's study of village sketches (a type of fiction popular in the United States in the 1830s and 1840s) provides a valuable summary of sketches that portray the community as homogeneous and fixed, but it ignores those by women writers, which typically depicted the diversity that increasingly characterized actual village communities at that time. These women's geographical mobility was restricted (although women writers of the time were not uniformly circumscribed in this way), and their subject matter reflected this fact. Yet their texts were enriched by what Gilligan, writing in a different context, has called the ability to attend to voices other than one's own. To varying degrees, the women's sketches portray differences among community members: all stress differences among men and among women (particularly the latter) as well as differences between the sexes, and some also depict cultural diversity. These writers represent community as dynamic, as something that must be negotiated and renegotiated because of its members' divergent histories, positions, expectations, and beliefs.

Consider each of the choices separately and select all that apply.

According to the passage, village sketches written by women in the United States in the 1830s and 1840s typically reflected

- ☐ the negotiations that characterized trade relationships between villages
- ☐ the fact that these women did not often travel very far beyond their own village
- ☐ the plurality of experiences and ideas that existed among the residents of a village

Questions 7 to 9 are based on this passage.

Select one answer choice.

$$BC = BE$$

Quantity A

$$\frac{AB}{BC}$$

Quantity B

$$\frac{1}{2}$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

$$1 < x + y$$

Quantity A

$$x^2 + y^2$$

Quantity B

$$1$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Quantity A

$$89! - 88!$$

Quantity B

$$(87!)(88)^2$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

An appliance store reduced the price of refrigerator R twice, first reducing its list price by 20 percent and then reducing its reduced price by 20 percent. After its two price reductions, the price of refrigerator R was \$960. For refrigerator S , with the same list price as refrigerator R , the store reduced its list price by 25 percent and then reduced its reduced price by 25 percent. What was the price of refrigerator S after its two price reductions?

- ☐ \$800.00
- ☐ \$843.75
- ☐ \$864.00
- ☐ \$866.40
- ☐ \$900.00

Select one answer choice.

If $s^{-2} = \frac{1}{4}$, which of the following could be the value of $\frac{1}{4}s$?

- ☐ $\frac{1}{16}$ ☐ $\frac{1}{8}$ ☐ $\frac{1}{4}$ ☐ $\frac{1}{2}$ ☐ 1

Select one answer choice.

Select one answer choice.

In the trapezoid shown, $BC = 10$ and $AD = 16$. If the area of the trapezoid is 104, what is the perimeter of the trapezoid?

- ☐ 34
- ☐ 42
- ☐ 44
- ☐ 46
- ☐ 52

Select one answer choice.

$\sqrt[3]{n}$ is a prime number.

Which of the following could be the value of n ?

Indicate all such values.

- ☐ 8
- ☐ 9
- ☐ 64
- ☐ 81
- ☐ 125

The relative frequency distributions of the values in data set A and data set B are shown in two histograms, where each interval shown includes its left endpoint and excludes its right endpoint. The number of values in A is 2 times the number of values in B . Data set C consists of the values in A and the values in B . Which of the following could be the median of the values in C ?

- ☐ 5
- ☐ 15
- ☐ 25
- ☐ 35
- ☐ 45

Select one answer choice.

Organizations F and G have 20,000 and 30,000 members, respectively. The combined membership of the two organizations is 45,000. If one member of organization F is to be randomly selected, what is the probability that the member selected will also be a member of organization G ?

☐ $\frac{1}{3}$

☐ $\frac{1}{4}$

☐ $\frac{1}{5}$

☐ $\frac{1}{6}$

☐ $\frac{1}{9}$

Select one answer choice.

The figure above shows a normal distribution with mean m and standard deviation d , including approximate percents of the distribution corresponding to the six regions shown.

The lengths of phone calls made on a certain weekend by students at High School H are approximately normally distributed with a mean of 30 minutes and a standard deviation of 10 minutes. Which of the following statements must be true?

Indicate all such statements.

- ☐ The range of the lengths of the phone calls is less than 60 minutes.
- ☐ The lengths of half of the phone calls are each greater than 40 minutes.
- ☐ The length of a 35-minute phone call is 0.5 standard deviation from the mean of the lengths of the phone calls.
