

Navigating Through the Test

During this test, you can use the mouse OR the keyboard to move through the screens.

You can use the following standard keys on the keyboard:

Tab 

Press the Tab key to move from one selectable element on the page to the next. The current selectable element will be indicated by a thin blue border.

Examples of selectable elements:

- Buttons on the menu toolbar
- Answer options for test questions

Shift  and Tab 

Press the Shift and Tab keys to reverse direction through the selectable elements.

Spacebar 

Press the spacebar key to select an element. Press the spacebar key again to deselect the element.

Up  and Down 

Use the up and down arrows to scroll vertically.

Select **Continue** to proceed.

- Creating a disturbance or disruptive behavior in any form will not be tolerated. The test administrator has sole discretion in determining what constitutes disruptive behavior.
- Attempting to give or receive assistance or communication in any form is not permitted during the test administration. Discussion or sharing of test content or answers during the test administration, including breaks, and after the test administration, is prohibited.
- Removing or attempting to remove test content from the test center. Under no circumstances may test content or any part of the test content be removed, reproduced and/or disclosed by any means (e.g., hard copy, verbally, electronically) to any person or entity.
- Tampering with a computer during a computer-delivered test administration
- Attempting to remove scratch paper (either partially or in its entirety) from the computer-delivered testing room or using scratch paper before the test, during untimed sections of the test or during breaks
- Bringing food, beverages or tobacco into the testing room
- Bringing a weapon or firearm into the test center
- Leaving the test center vicinity during the test session or during breaks
- Leaving the testing room without permission. You are not permitted to go outside the test center building unless it is to use the restroom during the test administration, including breaks.
- Taking excessive or extended unscheduled breaks during the test session. Test center administrators are required to strictly monitor unscheduled breaks and report test takers who take excessive or extended breaks.
- Failing to follow any of the test administration regulations contained in the *GRE Information Bulletin*, on the GRE website, given by the test administrator or specified in any test materials

ETS reserves the right to take action for failure to comply with test administration regulations or the test administrator's directions. Such action may include, but is not limited to, barring you from future testing and/or withholding or canceling your scores. If your scores are canceled, they will not be reported, and your registration and test fees will not be refunded. Reports of cheating or fraud will be investigated thoroughly and offenders may be prosecuted to the full extent of the applicable laws.

Select **Continue** to proceed.

General Test Information

Timing Information

Total testing time on this test is 1 hour and 58 minutes.

If you wish to leave your seat during the test, please raise your hand or otherwise indicate that you need the administrator - timing will not stop.

Test Information

If you have a concern about the wording of a test question, please note the question number and continue the test. Report your concern to the administrator after you complete the test.

No credit will be given for any responses marked on scratch paper. Use the scratch paper to work out your answers. All scratch paper must be turned in to the administrator (or erased in front of the administrator in an at-home test) at the end of the testing session.

Within a timed section you may skip any question and return to it later before you exit the section. You should answer as many questions as possible during the test and manage your time with this in mind. Use the **Review** button at any time during the test to review which questions you have answered and which questions you have skipped.

Select **Continue** to proceed.

Analytical Writing

This section consists of a timed Analyze an Issue writing task. Standard timing for this section is 30 minutes. The timer displays the time remaining for the task.

Important Notice

Your essay response on the Analytical Writing section will be reviewed by ETS essay-similarity-detection software and by experienced essay readers during the scoring process. In light of the high value placed on independent intellectual activity within graduate schools and universities, your essay response should represent your original work. ETS reserves the right to cancel test scores of any test taker when an essay response includes, but is not limited to, any of the following:

- text that is unusually similar to that found in one or more other test essay responses;
- quoting or paraphrasing, without attribution, language that appears in published or unpublished sources; including sources from the Internet and/or sources provided by any third party;
- unacknowledged use of work that has been produced through collaboration with others without citation of the contribution of others;
- essays submitted as work of the test taker that appear to have been borrowed in whole or in part from elsewhere or prepared by another person.

When one or more of the preceding circumstances occurs, ETS may conclude, in its professional judgment, that the essay response does not reflect the independent writing skills that this test seeks to measure. When ETS reaches that conclusion, it cancels the Analytical Writing score, and because Analytical Writing scores are an integral part of the GRE General Test scores, those scores are canceled as well.

Some people believe that in order to be effective, political leaders must yield to public opinion and abandon principle for the sake of compromise. Others believe that the most essential quality of an effective leader is the ability to remain consistently committed to particular principles and objectives.

Write a response in which you discuss which view more closely aligns with your own position and explain your reasoning for the position you take. In developing and supporting your position, you should address both of the views presented.

Like many composers of electronic music, this composer is a pianist by training, and one might be tempted to hypothesize that this (i)_____ is due to the fact that early electronic instruments, such as the synthesizer, were keyboard controlled. (ii)_____, the fact that, historically, most composers in any genre began as pianists (iii)_____ that hypothesis.

Blank (i)

oddity
correlation
presumption

Blank (ii)

Furthermore
However
Specifically

Blank (iii)

clarifies
challenges
extends

Select one entry from each column.

Questions 4 and 5 are based on this passage.

From a biological perspective, culture may be broadly defined as shared variation in behavior that is generated and maintained by social learning—through imitation or teaching, for example. Social learning in animals is often difficult to demonstrate directly. But the presence of culture can be established by observation and deduction: when behavioral differences exist that cannot be accounted for by genetic or environmental factors, cultural transmission must be occurring. Critics respond that it is often difficult to rule out hypotheses that genes or learned individual responses to differing environments are responsible for behavioral patterns. Often implicit in this argument is the notion that social learning, considered a more complex and more cognitively demanding phenomenon than individual learning, should be invoked only as an explanation of last resort.

According to the passage, the occurrence of social learning can be established by

- ☐ identifying the presence of a shared variation in behavior
- ☐ establishing whether a learned behavior is complex or simple
- ☐ examining whether a behavioral difference is maintained over time
- ☐ eliminating alternative explanations for a shared behavioral pattern
- ☐ comparing behavior learned through teaching with that learned through imitation

Select one answer choice.

Questions 4 and 5 are based on this passage.

From a biological perspective, culture may be broadly defined as shared variation in behavior that is generated and maintained by social learning—through imitation or teaching, for example. Social learning in animals is often difficult to demonstrate directly. But the presence of culture can be established by observation and deduction: when behavioral differences exist that cannot be accounted for by genetic or environmental factors, cultural transmission must be occurring. Critics respond that it is often difficult to rule out hypotheses that genes or learned individual responses to differing environments are responsible for behavioral patterns. Often implicit in this argument is the notion that social learning, considered a more complex and more cognitively demanding phenomenon than individual learning, should be invoked only as an explanation of last resort.

Consider each of the choices separately and select all that apply.

The passage suggests which of the following about individual learning?

- ☐ It does not occur as a result of imitation or teaching.
- ☐ It is thought to be less complex than social learning.
- ☐ It can occur as a response to environmental factors.

Questions 10 to 12 are based on this passage.

Based on a division between written and oral history, the term “prehistory” is problematic for archaeologists in several ways. In Australia, for example, this division creates a false dichotomy, masking the coexistence of written and oral history in many parts of the country. Written language was introduced by British settlers, but settlement of the continent continued over an extended period—from 1788 in Sydney until well into the twentieth century in the Western Desert. Thus, any distinction in archaeology between “historic” (written) and “prehistoric” (oral) creates an artificial boundary within a period of continuous transition. More important, though, the term privileges written histories over oral ones. As Rhonda Craven argues, the term denies the validity of traditional Aboriginal experience and knowledge, which may then achieve legitimation only when oral evidence is transformed into written texts. In fact, oral histories are not only valid in and of themselves, but also they can have demonstrable antiquity, even longer than that of written histories. For example, the Aboriginal Ngarrindjeri people have a Dreaming story of seawaters’ rising and cutting off land from the mainland, creating the island now known as Kangaroo Island, an event that in fact occurred around 8,000 years ago, according to the scientific record.

Which of the following regarding the Ngarrindjeri people can be inferred from the passage?

- ☐ Many of their oral histories have been transformed into written texts.
- ☐ They began recording oral histories around 8,000 years ago.
- ☐ They preserve important events in their past through oral narrative.
- ☐ They have recently begun to incorporate scientific data into their Dreaming stories.
- ☐ Their Dreaming stories are of greater antiquity than are those of most Aboriginal peoples in the Western Desert.

Questions 10 to 12 are based on this passage.

Based on a division between written and oral history, the term “prehistory” is problematic for archaeologists in several ways. In Australia, for example, this division creates a false dichotomy, masking the coexistence of written and oral history in many parts of the country. Written language was introduced by British settlers, but settlement of the continent continued over an extended period—from 1788 in Sydney until well into the twentieth century in the Western Desert. Thus, any distinction in archaeology between “historic” (written) and “prehistoric” (oral) creates an artificial boundary within a period of continuous transition. More important, though, the term privileges written histories over oral ones. As Rhonda Craven argues, the term denies the validity of traditional Aboriginal experience and knowledge, which may then achieve legitimation only when oral evidence is transformed into written texts. In fact, oral histories are not only valid in and of themselves, but also they can have demonstrable antiquity, even longer than that of written histories. For example, the Aboriginal Ngarrindjeri people have a Dreaming story of seawaters’ rising and cutting off land from the mainland, creating the island now known as Kangaroo Island, an event that in fact occurred around 8,000 years ago, according to the scientific record.

It can be inferred from the passage that Rhonda Craven would agree with which of the following statements regarding oral history?

- ☐ It is more reliable than written history as a source of information regarding Australia prior to 1788.
- ☐ It is the only form of history available for studying the Aboriginal experience.
- ☐ It must be corroborated by scientific evidence in order to be considered valid.
- ☐ Its validity does not depend on its being presented in written form.
- ☐ It covers events only prior to the beginnings of British settlement in Australia.

Questions 10 to 12 are based on this passage.

Based on a division between written and oral history, the term “prehistory” is problematic for archaeologists in several ways. In Australia, for example, this division creates a false dichotomy, masking the coexistence of written and oral history in many parts of the country. Written language was introduced by British settlers, but settlement of the continent continued over an extended period—from 1788 in Sydney until well into the twentieth century in the Western Desert. Thus, any distinction in archaeology between “historic” (written) and “prehistoric” (oral) creates an artificial boundary within a period of continuous transition. More important, though, the term privileges written histories over oral ones. As Rhonda Craven argues, the term denies the validity of traditional Aboriginal experience and knowledge, which may then achieve legitimation only when oral evidence is transformed into written texts. In fact, oral histories are not only valid in and of themselves, but also they can have demonstrable antiquity, even longer than that of written histories. For example, the Aboriginal Ngarrindjeri people have a Dreaming story of seawaters’ rising and cutting off land from the mainland, creating the island now known as Kangaroo Island, an event that in fact occurred around 8,000 years ago, according to the scientific record.

Which of the following best describes the function of the highlighted sentence in the context of the passage as a whole?

- ☐ It compares the relative reliability of two kinds of evidence.
- ☐ It introduces a concept that is critiqued later in the passage.
- ☐ It presents an alternative to a problematic term discussed earlier in the passage.
- ☐ It defends the legitimacy of a particular kind of evidence.
- ☐ It elaborates on a claim made in the preceding sentence.

In the xy -plane shown, what is the area of triangle RST ?

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

The cost of producing 1 unit of a product at a certain manufacturing company is \$0.75. According to a sales model, if each unit has a selling price of \$1.00, the company expects to sell 1,000 units each month. For each \$0.05 increase in the unit selling price, the company expects to see a decrease of 100 units sold each month. According to the model, which of the following could be a unit selling price at which the company would expect a profit of at least \$250.00 each month? (Profit equals revenue minus cost.)

Indicate all such unit selling prices.

- ☐ \$1.05
- ☐ \$1.10
- ☐ \$1.20
- ☐ \$1.30
- ☐ \$1.35

Select one or more answer choices.

For all numbers a and b , the operation $\otimes$ is defined by $a \otimes b = ab^2$. For what value of x does $(x \otimes x) \otimes 3 = 72$?

☐ 2☐ $2\sqrt{2}$ ☐ 3☐ $2\sqrt{6}$ ☐ 6

Questions 5 and 6 are based on this passage.

The Wall Street millionaire Alfred Loomis was an amateur physicist who made significant contributions to scientific research. In 1928 he purchased three identical clocks, the most accurate available at that time. Loomis set up the clocks in a triangular orientation to one another, to break the gravitationally induced synchronic action among their pendulums, and by analyzing their minute variations, verified a theoretically predicted tidal effect of the Moon on clocks. These results later contributed to the development of LORAN (Long-Range Navigation), which triangulates the positions of ships and aircraft by comparing the difference in arrival times of signals coming from multiple radio beacons at various groundbased locations, a calculation that depends on accurate timekeeping.

It can be inferred from the passage that the development of LORAN was made possible in part by

- ☐ Loomis' refutation of previously accepted theoretical predictions about the tidal effect of the Moon
- ☐ Loomis' ability to finance multiple major research efforts with his own money
- ☐ the ability to direct multiple radio beacons from an aircraft or ship to various locations on land
- ☐ the ability to measure discrepancies between timekeeping instruments caused by the Moon
- ☐ the ability to synchronize a clock on board an aircraft with one on board a ship

Select one answer choice.

Questions 5 and 6 are based on this passage.

The Wall Street millionaire Alfred Loomis was an amateur physicist who made significant contributions to scientific research. In 1928 he purchased three identical clocks, the most accurate available at that time. Loomis set up the clocks in a triangular orientation to one another, to break the gravitationally induced synchronic action among their pendulums, and by analyzing their minute variations, verified a theoretically predicted tidal effect of the Moon on clocks. These results later contributed to the development of LORAN (Long-Range Navigation), which triangulates the positions of ships and aircraft by comparing the difference in arrival times of signals coming from multiple radio beacons at various groundbased locations, a calculation that depends on accurate timekeeping.

According to the passage, Loomis' clock experiment accomplished which of the following?

- ☐ It enabled Loomis to achieve his goal of using highly accurate timekeeping to make scientific advances in navigation.
- ☐ It provided confirmatory evidence for an effect for which a scientific explanation had already been proposed.
- ☐ It enabled Loomis to refine his theory about the tidal effect of the Moon on clocks.
- ☐ It spurred the development of clocks that are not affected by gravity.
- ☐ It brought Loomis' work to the attention of professional physicists.

Select one answer choice.

Questions 5 and 6 are based on this passage.

The Wall Street millionaire Alfred Loomis was an amateur physicist who made significant contributions to scientific research. In 1928 he purchased three identical clocks, the most accurate available at that time. Loomis set up the clocks in a triangular orientation to one another, to break the gravitationally induced synchronic action among their pendulums, and by analyzing their minute variations, verified a theoretically predicted tidal effect of the Moon on clocks. These results later contributed to the development of LORAN (Long-Range Navigation), which triangulates the positions of ships and aircraft by comparing the difference in arrival times of signals coming from multiple radio beacons at various groundbased locations, a calculation that depends on accurate timekeeping.

According to the passage, Loomis' clock experiment accomplished which of the following?

- ☐ It enabled Loomis to achieve his goal of using highly accurate timekeeping to make scientific advances in navigation.
- ☐ It provided confirmatory evidence for an effect for which a scientific explanation had already been proposed.
- ☐ It enabled Loomis to refine his theory about the tidal effect of the Moon on clocks.
- ☐ It spurred the development of clocks that are not affected by gravity.
- ☐ It brought Loomis' work to the attention of professional physicists.

Questions 7 to 9 are based on this passage.

The first phase of English literature can be described as ending with the Protestant Reformation, which radically changed English culture. Though the literature produced before the Reformation varied markedly, a consistency is often apparent: it was grounded in the Latin Christianity that dominated Western Europe from the early Middle Ages to the sixteenth century. The Christian Church, however, had taken form in the midst of the powerful pagan cultures of ancient Greece and Rome, and the later Roman and Irish missionaries to England planted the Church in the midst of still another pagan culture, that of the ancient Germanic peoples who inhabited England. Oddly enough, the new religion scorned neither the literary tradition of Greco-Roman paganism nor that of Germanic paganism. Aldhelm, the first English poet who wrote in Latin, and Caedmon, the first to use English, were contemporaries, and each sang the praises of the Christian God in an artistic medium inherited from paganism.

According to the passage, which of the following describes the treatment of Greco-Roman paganism and Germanic paganism by Latin Christianity?

- ☐ Disdainful rejection of many practices of both
- ☐ Careful distinction between the traditions of the two
- ☐ Acceptance of the literary traditions of both
- ☐ Adaptation of classical literary forms and disinterest in Germanic literary traditions
- ☐ Translation of classical literature into an artistic medium inherited from Germanic paganism

Select one answer choice.

Questions 7 to 9 are based on this passage.

The first phase of English literature can be described as ending with the Protestant Reformation, which radically changed English culture. Though the literature produced before the Reformation varied markedly, a consistency is often apparent: it was grounded in the Latin Christianity that dominated Western Europe from the early Middle Ages to the sixteenth century. The Christian Church, however, had taken form in the midst of the powerful pagan cultures of ancient Greece and Rome, and the later Roman and Irish missionaries to England planted the Church in the midst of still another pagan culture, that of the ancient Germanic peoples who inhabited England. Oddly enough, the new religion scorned neither the literary tradition of Greco-Roman paganism nor that of Germanic paganism. Aldhelm, the first English poet who wrote in Latin, and Caedmon, the first to use English, were contemporaries, and each sang the praises of the Christian God in an artistic medium inherited from paganism.

According to the passage, one characteristic of the literature of pre-Reformation England is that it was

- ☒ stylistically consistent
- ☐ predominantly poetic
- ☐ morally indifferent
- ☐ noticeably diverse
- ☐ culturally neutral

Select one answer choice.

Questions 7 to 9 are based on this passage.

The first phase of English literature can be described as ending with the Protestant Reformation, which radically changed English culture. Though the literature produced before the Reformation varied markedly, a consistency is often apparent: it was grounded in the Latin Christianity that dominated Western Europe from the early Middle Ages to the sixteenth century. The Christian Church, however, had taken form in the midst of the powerful pagan cultures of ancient Greece and Rome, and the later Roman and Irish missionaries to England planted the Church in the midst of still another pagan culture, that of the ancient Germanic peoples who inhabited England. Oddly enough, the new religion scorned neither the literary tradition of Greco-Roman paganism nor that of Germanic paganism. Aldhelm, the first English poet who wrote in Latin, and Caedmon, the first to use English, were contemporaries, and each sang the praises of the Christian God in an artistic medium inherited from paganism.

It can be inferred that the author of the passage considers the relationship between Christianity and paganism in England before the Reformation to have been

- ☐ a reciprocally productive one
- ☐ a marginally interdependent one
- ☐ a mutually proselytizing one
- ☐ an unexpected one
- ☐ an appropriate one

Select one answer choice.

Questions 7 to 9 are based on this passage.

The first phase of English literature can be described as ending with the Protestant Reformation, which radically changed English culture. Despite all the efforts of his admirers to bolster his prestige, the reputation of Alexander Pope, both as a person and as a writer, remains _____.

- ☐ insecure
- ☐ pristine
- ☐ nebulous
- ☐ unsullied
- ☐ precarious
- ☐ rudimentary

Select two answer choices.

Question 13 is based on this passage.

A cave in Central America was occupied by humans for much of the period from 9,000 to 500 years ago. Archaeological excavations in the cave have discovered remains of food plants at every level of habitation, increasing from fewer than ten food plant species in the earliest (lowest) levels to over 30 species in the latest levels. Clearly, later inhabitants of the cave used a greater variety of plants as food than earlier inhabitants did.

Which of the following, if true of the cave, most weakens the argument?

- ☐ Some of the plant species found in the earlier (lower) levels of habitation are not found at all in the later (upper) levels of habitation.
- ☐ The remains of some plant species, such as squash and chili peppers, show changes from the middle to the later (upper) levels that indicate domestication.
- ☐ At certain points during the period from 9,000 to 500 years ago, the cave was abandoned for a time and later reoccupied by people who were probably of a different culture than the earlier inhabitants.
- ☐ Virtually all the plant remains found at the earliest (lowest) levels of habitation are tough fibers that are relatively resistant to decomposition.
- ☐ The total volume of food plant remains found in the earlier (lower) layers was greater than that found in the later (upper) layers.

Select one answer choice.

Questions 14 and 15 are based on this passage.

A longstanding scholarly neglect of the subject of cooking is partly attributable to the antiquated “separate spheres” schema that differentiated a private female sphere, which included food preparation and consumption, from a public male sphere, which included food production. While this concept never reflected most women’s daily realities—women are major food producers worldwide—the ideological polarization certainly influenced the development of academia: it effectively segregated women into working in low-status “domestic” disciplines such as dietetics and home economics, while the male-dominated realms of industrial agriculture, food technology, mass retailing, and corporate management enjoyed public respect and academic prestige. This institutionalized bias delayed serious attention to cooking even after feminists in the 1960s obliterated the notion of separate spheres and more women entered all areas of academia.

The primary purpose of the passage is to

- ☐ examine the origins of an influential theory
- ☐ account for the dearth of research on a particular subject
- ☐ contrast two scholarly approaches to the study of a phenomenon
- ☐ explain how a certain distinction came to dominate an academic discipline
- ☐ question the aptness of a particular schema for understanding a development

Select one answer choice.

Questions 14 and 15 are based on this passage.

A longstanding scholarly neglect of the subject of cooking is partly attributable to the antiquated “separate spheres” schema that differentiated a private female sphere, which included food preparation and consumption, from a public male sphere, which included food production. While this concept never reflected most women’s daily realities—women are major food producers worldwide—the ideological polarization certainly influenced the development of academia: it effectively segregated women into working in low-status “domestic” disciplines such as dietetics and home economics, while the male-dominated realms of industrial agriculture, food technology, mass retailing, and corporate management enjoyed public respect and academic prestige. This institutionalized bias delayed serious attention to cooking even after feminists in the 1960s obliterated the notion of separate spheres and more women entered all areas of academia.

- The author mentions “feminists” primarily in order to
- ☐ elaborate on a particular rift in scholarly circles
 - ☐ answer a particular challenge to the “separate spheres” schema
 - ☐ cite a cultural development that influenced the study of food
 - ☐ help account for an ideological shift within academia
 - ☐ underscore the tenacity of an attitude that constrained scholarly inquiry

Select one answer choice.

Questions 14 and 15 are based on this passage.

A longstanding scholarly neglect of the subject of cooking is partly attributable to the antiquated “separate spheres” schema that differentiated a private female sphere, which included food preparation and consumption, from a public male sphere, which included food production. While this concept never reflected most women’s daily realities—women are major food producers worldwide—the ideological polarization certainly influenced the development of academia: it effectively segregated women into working in low-status “domestic” disciplines such as dietetics and home economics, while the male-dominated realms of industrial agriculture, food technology, mass retailing, and corporate management enjoyed public respect and academic prestige. Quantitative Reasoning

15 Questions

26 minutes (standard time)

For each question, indicate the best answer, using the directions given. If you need more detailed directions, select **Help** at any time.

An on-screen calculator is available for each question in this section. To use the calculator, select the calculator button.

If a question has answer choices with **ovals** , then the correct answer consists of a single choice. If a question has answer choices with **square boxes** , then the correct answer consists of one or more answer choices. Read the directions for each question carefully. The directions will indicate if you should select one or more answer choices. To answer questions based on a data presentation, you may need to scroll or use your keyboard to access the entire presentation.

All numbers used are real numbers.

All figures are assumed to lie in a plane unless otherwise indicated.

Geometric figures, such as lines, circles, triangles, and quadrilaterals, **are not necessarily** drawn to scale. That is, you should **not** assume that quantities such as lengths and angle measures are as they appear in a figure. You should assume, however, that lines shown as straight are actually straight, points on a line are in the order shown, and more generally, all geometric objects are in the relative positions shown. For questions with geometric figures, you should base your answers on geometric reasoning, not on estimating or comparing quantities by sight or by measurement.

Coordinate systems, such as xy -planes and number lines, **are** drawn to scale; therefore you can read, estimate, or compare quantities in such figures by sight or by measurement.

Graphical data presentations, such as bar graphs, circle graphs, and line graphs, **are** drawn to scale; therefore, you can read, estimate, or compare data values by sight or by measurement.

Select **Continue** to proceed.

x , y , and z are integers such that $1 < x < y < z$ and $xyz = 105$.

Quantity A

$$x + z$$

Quantity B

$$2y$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

$$\begin{aligned}8k - 5m &= 15 \\ 2k + m &= 15\end{aligned}$$

Quantity A

k

Quantity B

m

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

The diagonal of a rectangle is 15.

Quantity A

The length of the longer side of the rectangle

Quantity B

12

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

The circular region has center O and $PQ = 10$.

Quantity A

The area of the circular region

Quantity B

25π

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

In the distribution of heights in a group of a thousand people, height p is at the 42nd percentile, height r is at the 48th percentile, height s is at the 54th percentile, and height t is at the 60th percentile.

Quantity A

$$r - p$$

Quantity B

$$t - s$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

If $x^2 = b$ and $y^2 = q$, where x and y are greater than 0, which of the following is equal to $(x+y)^2$?

- ☐ $b + q$ ☐ $b + 2bq + q$ ☐ $b^2 + 2bq + q^2$ ☐ $b + \sqrt{bq} + q$ ☐ $b + 2\sqrt{bq} + q$

Select one answer choice.

A certain monthly interest rate changed each month in 1999. For each month, the rate was either 0.01 percentage point higher or 0.01 percentage point lower than that of the previous month. For January of 1999, the rate was 0.50 percentage point. How many of the five values 0.48, 0.49, 0.50, 0.51, and 0.52 cannot be the rate, in percentage points, for April 1999 ?

- ☐ None
- ☐ One
- ☐ Two
- ☐ Three
- ☐ Four

Select one answer choice.

Equilateral triangle ABC is inscribed in a circle with center O and area 64π . What is the height of triangle ABC ?

- ☐ 8
- ☐ 10
- ☐ 12
- ☐ 14
- ☐ 16

Select one answer choice.

The value of a certain ring at the time it was purchased was x dollars. If after one year the value of the ring had increased by y percent, which of the following expressions represents the value of the ring at the end of that year?

- ☐ $x + 100y$ ☐ $x + \frac{y}{100}$ ☐ $\frac{x+y}{100}$ ☐ $\frac{xy}{100}$ ☐ $x + \frac{xy}{100}$

Select one answer choice.

What is the sum of the integers between -90 and 95 , inclusive?

- ☐ 5
- ☐ 185
- ☐ 465
- ☐ 4,275
- ☐ 4,560

Select one answer choice.

A list consists of all possible four-digit positive integers that can be formed using 1, 2, 3, and 4 without repetitions. If the integers in the list are ordered from least to greatest, what is the 20th integer in the list?

☐ 3,412

☐ 3,421

☐ 4,123

☐ 4,132

☐ 4,213

Select one answer choice.

A list consists of all possible four-digit positive integers that can be formed using 1, 2, 3, and 4 without repetitions. If the integers in the list are ordered from least to greatest, what is the 20th integer in the list?

☐ 3,412

☐ 3,421

☐ 4,123

☐ 4,132

☐ 4,213

Select one answer choice.

A ball is dropped from a height of 3 meters and bounces repeatedly. After each bounce, it reaches a height that is 65 percent of its previous height. If the height of the ball after the n th bounce is less than 20 centimeters, which of the following could be the value of n ?

Indicate all such values.

☐ 4

☐ 5

☐ 6

☐ 7

☐ 8

The figure above shows a normal distribution with mean m and standard deviation d , including approximate percents of the distribution corresponding to the six regions shown.

A factory produces metal rods used for machines of a certain type. The distribution of lengths of the rods is approximately normal with mean 15.00 centimeters and standard deviation 0.06 centimeter. Approximately what percent of the rods produced at the factory have lengths greater than 15.10 centimeters?

- ☐ 5% ☐ 7.5% ☐ 10% ☐ 12.5% ☐ 15%

Select one answer choice.

7, 9, 10, 12, 14, 15, 17, 18, 19, 21, 23

A car dealership sold a total of 165 cars for the first 11 months of a certain year, and the list shows the monthly numbers of cars sold, which are ordered from least to greatest. The dealership sold x cars for the last month of the year. If the average (arithmetic mean) of the 12 monthly numbers of cars sold is equal to the median of the 12 monthly numbers of cars sold, what is the greatest possible value of x ?

The quantities r and s are related in such a way that every increase of 2 units in s results in an increase of 3 units in r . Which of the following equations are consistent with such a relationship?

Indicate all such equations.

☐ $3r = 2s$

☐ $2r = 3s + 1$

☐ $r = s + \frac{3}{2}$

☐ $r = \frac{3}{2}s$

Select one or more answer choices.

The quantities r and s are related in such a way that every increase of 2 units in s results in an increase of 3 units in r . Which of the following equations are consistent with such a relationship?

Indicate all such equations.

☐ $3r = 2s$

☐ $2r = 3s + 1$

☐ $r = s + \frac{3}{2}$

☐ $r = \frac{3}{2}s$
