

The total amount of interest earned on \$10,000 invested for one year was equal to 13.75 percent of the amount invested.

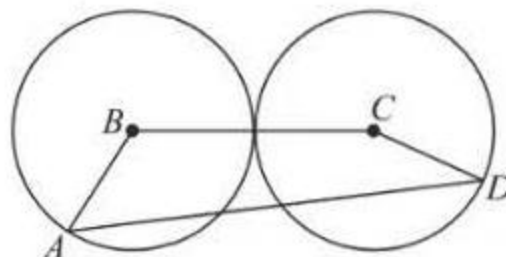

Quantity A

The total amount of interest earned on the investment that year

Quantity B

\$1,375

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☒ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

The two circles have centers at B and C , respectively, and are mutually tangent. Each circle has radius r .

Quantity A

The perimeter of quadrilateral $ABCD$

Quantity B

$8r$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Quantity A

The average (arithmetic mean)
of x and y

Quantity B

The average (arithmetic mean)
of $2x$ and $\frac{y}{2}$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

$$xy < 0$$

$$yz < 0$$

Quantity A

$$xz$$

Quantity B

$$0$$

- ☒ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

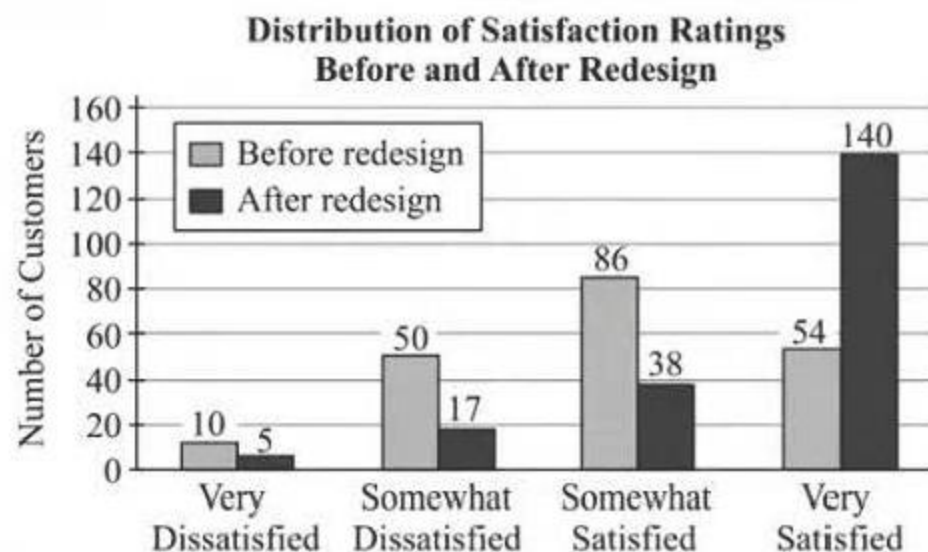

If $(a + b)^2 - 6(a + b) + 9 = 0$, what is the value of $a + b$?

- ☒ -5
- ☐ -3
- ☐ -1
- ☐ 1
- ☐ 3

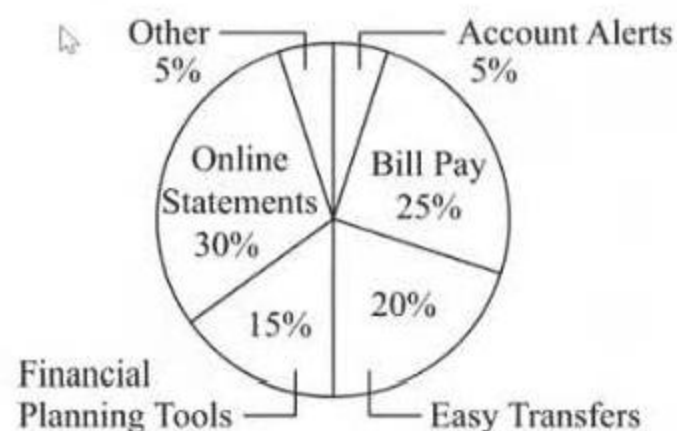

Select one answer choice.

Questions 6 to 8 are based on the following data.

Results of Survey of 200 Customers of Bank X's Redesigned Web Site

Distribution of Very Satisfied Customers After Redesign, by Favorite Feature After Redesign

Bank X calculates a customer satisfaction index for the Web site after the redesign. Responses of "very satisfied" are each assigned a value of 3, responses of "somewhat satisfied" are each assigned a value of 2, responses of "somewhat dissatisfied" are each assigned a value of 1, and responses of "very dissatisfied" are each assigned a value of 0. The customer satisfaction index is the average (arithmetic mean) of the values. Which of the following is closest to the customer satisfaction index for the Web site after the redesign?

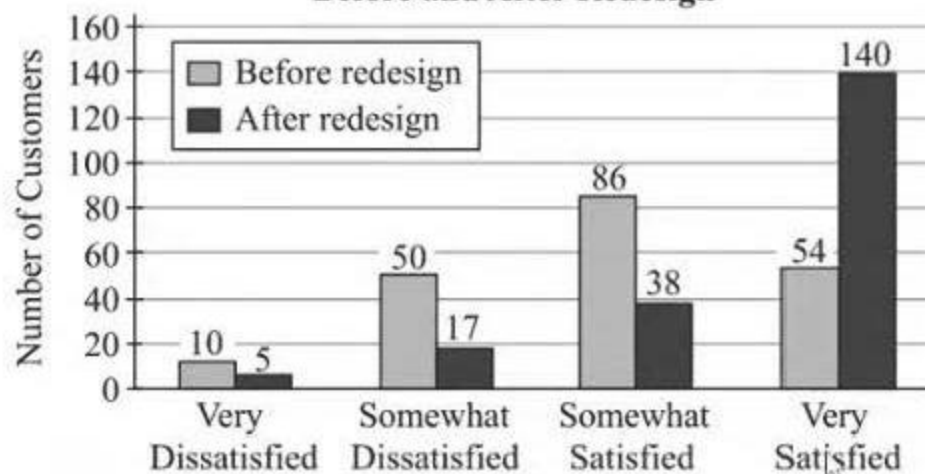

☐ 2.0☐ 2.2☐ 2.4☐ 2.6☐ 2.8

Select one answer choice.

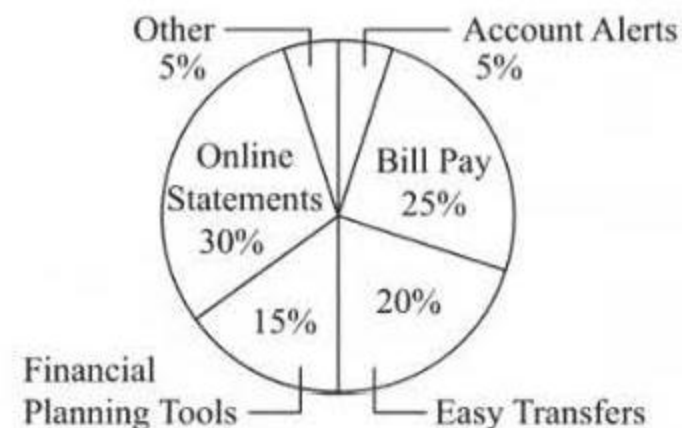

Questions 6 to 8 are based on the following data.

Results of Survey of 200 Customers of Bank X's Redesigned Web Site

Distribution of Satisfaction Ratings Before and After Redesign

Distribution of Very Satisfied Customers After Redesign, by Favorite Feature After Redesign

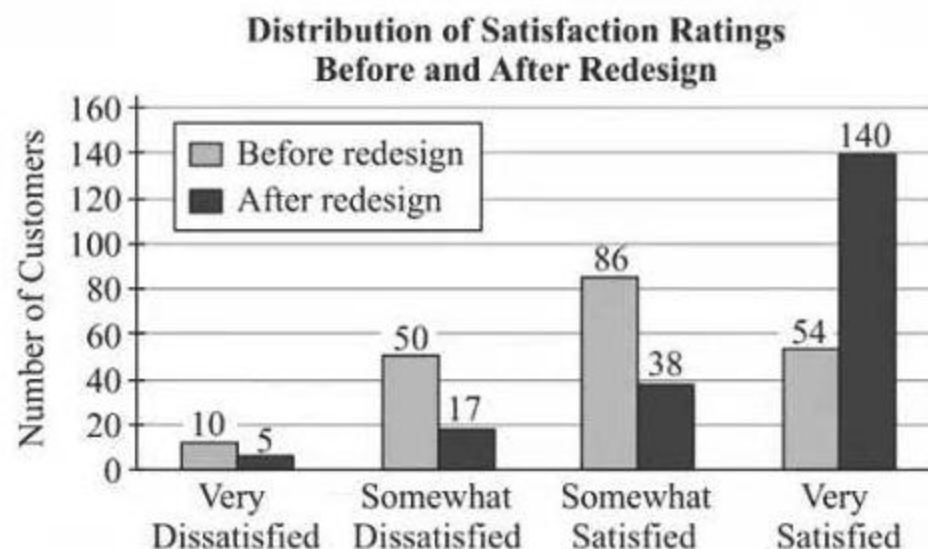

One of the 200 customers is to be selected at random. What is the probability that the customer will be one who was very satisfied with the Web site after the redesign and whose favorite feature was easy transfers?

- ☐ 0.14
 ☐ 0.20
 ☐ 0.28
 ☐ 0.56
 ☐ 0.70

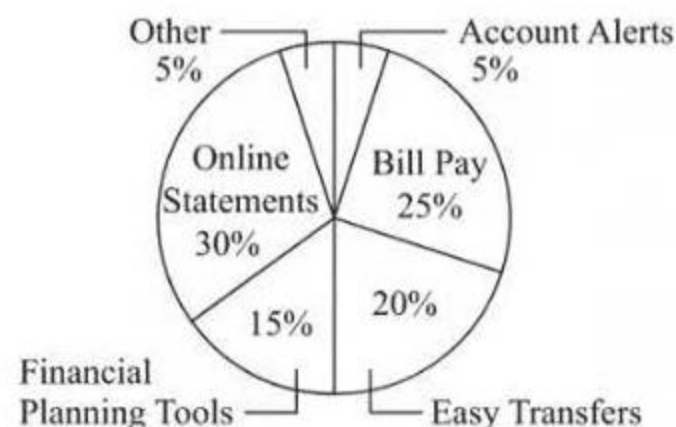

Select one answer choice.

Questions 6 to 8 are based on the following data.

Results of Survey of 200 Customers of Bank X's Redesigned Web Site

Distribution of Very Satisfied Customers After Redesign, by Favorite Feature After Redesign

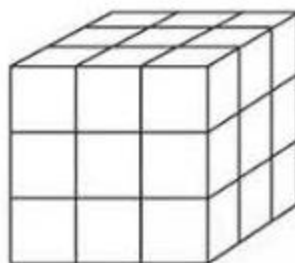

The number of customers who were very satisfied with the Web site after the redesign is approximately what percent greater than the number of customers who were very satisfied with the Web site before the redesign?

Give your answer to the nearest whole percent.

 %

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

A large cube is to be formed by placing together 27 identical white cubes as shown. The large cube will then be placed on a floor, and the 5 exposed faces will be painted black. How many of the original 27 cubes will have exactly 2 black faces?

- ☐ 8
- ☐ 9
- ☐ 12
- ☒ 16
- ☐ 18

If k is a positive integer and $n = 7k + 8$, what is the remainder when $4n$ is divided by 14?

- ☐ 2
- ☐ 4
- ☐ 6
- ☐ 8
- ☐ 10

Select one answer choice.

Triangle T has a base of length 8 and an area of 20. Which of the following statements must be true?

Indicate all such statements.

- ☐ The height of T that corresponds to the base of length 8 is 5.
- ☐ T is an isosceles triangle.
- ☐ The perimeter of T is less than or equal to 20.

Last week George's annual salary increased by 6 percent and he received a \$450 bonus. The combined total of George's annual salary after the increase and the bonus he received is 8 percent greater than his annual salary before the increase. What was George's annual salary before the increase?

\$

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

Select one entry for the blank. Fill the blank in the way that best completes the text.

Wood is an environmentally friendly building material because it _____ carbon dioxide, absorbing it during growth and retaining it even after it has been turned into lumber.

disperses
eradicates
sequesters
respires
regulates

Select one answer choice.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

She is (i)_____ on the Senate floor, just as she is elsewhere: her speech is (ii)_____ with the verbal pomposity of much senatorial oratory.

Blank (i)

gregarious
opinionated
plainspoken

Blank (ii)

fraught
unadorned
consistent

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Many perplexed observers find present-day museum design a choice between outlandishly sculptural structures that (i)_____ the proper display of art and neutral containers so (ii)_____ to art that all architectural presence is lost. But the New Museum persuasively demonstrates that honoring art and honoring architecture need not be (iii)_____ propositions.

Blank (i)

ignore
enhance
honor

Blank (ii)

submissive
demeaning
impervious

Blank (iii)

carefully considered
mutually exclusive
entirely practical

Select one entry from each column.

Questions 4 and 5 are based on this passage.

Academics have been reconsidering the meaning of “wilderness” and its usefulness to conservation strategies. The idea of pristine wilderness is historically inaccurate, argue scholars of Native American history, who have demonstrated that Native Americans shaped their environments with their agricultural practices and residential patterns. Other scholars argue that wilderness is simply a cultural construct created in opposition to modern society, not a real place untouched by humans. Scientists, in turn, have argued that the goal of wilderness preservation is based on a model in which ecosystems progress toward a stable equilibrium state, a model replaced in the 1970s with one stressing constant change. These insights complicate wilderness management, which critics charge aims to preserve a supposedly stable environment that existed prior to human disturbance.

Based on the passage, the “scholars of Native American history” and the “other scholars” would probably agree that

- ☐ it is a mistake to think that Native Americans inhabited a pristine wilderness
- ☐ Native American agricultural practices have helped shape the modern understanding of wilderness
- ☐ modern society is not as much of a threat to pristine wilderness as is commonly thought
- ☐ there is very little pristine wilderness left to preserve
- ☐ the idea of wilderness remains useful to conservation strategies

Select one answer choice.

Questions 4 and 5 are based on this passage.

Academics have been reconsidering the meaning of “wilderness” and its usefulness to conservation strategies. The idea of pristine wilderness is historically inaccurate, argue scholars of Native American history, who have demonstrated that Native Americans shaped their environments with their agricultural practices and residential patterns. Other scholars argue that wilderness is simply a cultural construct created in opposition to modern society, not a real place untouched by humans. Scientists, in turn, have argued that the goal of wilderness preservation is based on a **model** in which ecosystems progress toward a stable equilibrium state, a model replaced in the 1970s with one stressing constant change. These insights complicate wilderness management, which critics charge aims to preserve a supposedly stable environment that existed prior to human disturbance.

The passage implies which of the following about the “model” ?

- ☐ It has had some influence on scholars of Native American history.
- ☐ It fits poorly with data initially gathered in the 1970s.
- ☐ It has been influential in the reconsideration of the meaning of wilderness.
- ☐ It underlies a conservation strategy that has recently been questioned.
- ☐ It is based on the idea that wilderness is simply a cultural construct.

Select one answer choice.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

The tribes' _____ a settled mode of living was derived from their long-standing traditions, which, though differing from one tribal group to another, always included a resistance to nomadic lifestyles.

- ☐ curiosity about
- ☐ proclivity toward
- ☐ predilection for
- ☐ unfamiliarity with
- ☐ rejection of
- ☐ disdain for

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

So effective are inhaled steroids at staving off asthma attacks that doctors now regard them as _____ therapy.

- ☐ a mainstay of
- ☐ a precursor to
- ☐ a supplement to
- ☐ a complement to
- ☐ a foundation of
- ☐ an antithesis to

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Researchers comparing test subjects' abilities to interpret others' facial expressions found that while some expressions were easy to interpret, others were difficult because they were so _____ the person making the expression.

- ☐ habitual for
- ☐ customary for
- ☐ peculiar to
- ☐ idiosyncratic to
- ☐ opaque to
- ☐ inoffensive to

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

The high seriousness of St. Aubyn' s novel is not at all superficial; in fact, it is _____ the novel' s ferociously comic vision.

- ☐ redolent of
- ☐ reminiscent of
- ☐ intrinsic to
- ☐ inimical to
- ☐ antagonistic to
- ☐ inextricable from

Select two answer choices.

Questions 10 to 12 are based on this passage.

Ralph Cohen, in his 1964 critical history of Thomson's *The Seasons*, argued nearly half a century ago that illustrations are criticism of the works they illustrate. More recently, critics have fruitfully explored illustrations of the works of Defoe and Sterne. In her study of graphic design and the novel, Janine Barchas has explained the function of illustrations as "interpretive guides." Barchas mainly discusses frontispieces, but her point applies to other kinds of illustrations. In the case of Tobias Smollett, illustrations not only indicate what illustrators thought of the novels, but may also reveal how those novels were received by readers. The number and diversity of the images are especially valuable because, as Fred W. Boege long ago demonstrated, we know relatively little about how eighteenth-century readers conceived of Smollett as a novelist. Our understanding of Smollett's reception has improved since Boege's time, but some difficulties in knowing what readers thought of Smollett remain, because recorded responses are scanty. *Roderick Random*, for instance, did not receive any reviews, since it was published before reviewing contemporary fiction became widespread. And reviews of the other novels consist mainly of large excerpts from the work itself with a few general remarks on how well the characters are conceived. Nor do the few responses we have provide a consistent picture of how Smollett was read. The illustrations, therefore, give us alternative perspectives that can only enrich our understanding of Smollett's

The primary purpose of the passage is to

- ☐ refute an established view of how an author's works were received by his contemporaries
- ☐ account for the sophistication of graphic design in a particular literary genre
- ☐ compare the eighteenth-century reception of a work with its current reception
- ☐ make a case for a particular approach to studying the works of a novelist
- ☐ argue for the importance of reviving interest in the early writings of an author

Select one answer choice.

Questions 10 to 12 are based on this passage.

illustrate. More recently, critics have fruitfully explored illustrations of the works of Defoe and Sterne. In her study of graphic design and the novel, Janine Barchas has explained the function of illustrations as “interpretive guides.” Barchas mainly discusses frontispieces, but her point applies to other kinds of illustrations. In the case of Tobias Smollett, illustrations not only indicate what illustrators thought of the novels, but may also reveal how those novels were received by readers. The number and diversity of the images are especially valuable because, as Fred W. Boege long ago demonstrated, we know relatively little about how eighteenth-century readers conceived of Smollett as a novelist. Our understanding of Smollett’s reception has improved since Boege’s time, but some difficulties in knowing what readers thought of Smollett remain, because recorded responses are scanty. *Roderick Random*, for instance, did not receive any reviews, since it was published before reviewing contemporary fiction became widespread. And reviews of the other novels consist mainly of large excerpts from the work itself with a few general remarks on how well the characters are conceived. Nor do the few responses we have provide a consistent picture of how Smollett was read. The illustrations, therefore, give us alternative perspectives that can only enrich our understanding of Smollett’s reception.

The primary purpose of the passage is to

- ☐ refute an established view of how an author’s works were received by his contemporaries
- ☒ account for the sophistication of graphic design in a particular literary genre
- ☐ compare the eighteenth-century reception of a work with its current reception
- ☐ make a case for a particular approach to studying the works of a novelist
- ☐ argue for the importance of reviving interest in the early writings of an author

Select one answer choice.

Questions 10 to 12 are based on this passage.

Ralph Cohen, in his 1964 critical history of Thomson's *The Seasons*, argued nearly half a century ago that illustrations are criticism of the works they illustrate. More recently, critics have fruitfully explored illustrations of the works of Defoe and Sterne. In her study of graphic design and the novel, Janine Barchas has explained the function of illustrations as "interpretive guides." Barchas mainly discusses frontispieces, but her point applies to other kinds of illustrations. In the case of Tobias Smollett, illustrations not only indicate what illustrators thought of the novels, but may also reveal how those novels were received by readers. The number and diversity of the images are especially valuable because, as Fred W. Boege long ago demonstrated, we know relatively little about how eighteenth-century readers conceived of Smollett as a novelist. Our understanding of Smollett's reception has improved since Boege's time, but some difficulties in knowing what readers thought of Smollett remain, because recorded responses are scanty. *Roderick Random*, for instance, did not receive any reviews, since it was published before reviewing contemporary fiction became widespread. And reviews of the other novels consist mainly of large excerpts from the work itself with a few general remarks on how well the characters are conceived. Nor do the few responses we have provide a consistent picture of how Smollett was read. The illustrations, therefore, give us alternative perspectives

The author of the passage cites Janine Barchas primarily to

- ☐ highlight a shortcoming of an earlier approach
- ☐ support the credibility of an analytical strategy
- ☐ question an assumption underlying a critical trend
- ☐ illustrate how critics' understanding of Smollett's eighteenth-century reception has improved
- ☐ explain why methods used to study other eighteenth-century novelists might not apply to Smollett

Select one answer choice.

Questions 10 to 12 are based on this passage.

Ralph Cohen, in his 1964 critical history of Thomson's *The Seasons*, argued nearly half a century ago that illustrations are criticism of the works they illustrate. More recently, critics have fruitfully explored illustrations of the works of Defoe and Sterne. In her study of graphic design and the novel, Janine Barchas has explained the function of illustrations as "interpretive guides." Barchas mainly discusses frontispieces, but her point applies to other kinds of illustrations. In the case of Tobias Smollett, illustrations not only indicate what illustrators thought of the novels, but may also reveal how those novels were received by readers. The number and diversity of the images are especially valuable because, as Fred W. Boege long ago demonstrated, we know relatively little about how eighteenth-century readers conceived of Smollett as a novelist. Our understanding of Smollett's reception has improved since Boege's time, but some difficulties in knowing what readers thought of Smollett remain, because recorded responses are scanty. *Roderick Random*, for instance, did not receive any reviews, since it was published before reviewing contemporary fiction became widespread. And reviews of the other novels consist mainly of large excerpts from the work itself with a few general remarks on how well the characters are conceived. Nor do the few responses we have provide a consistent picture of how Smollett was read. The illustrations, therefore, give us alternative perspectives

The passage suggests that eighteenth-century reviewers of Smollett's novels were likely to

- ☐ quote long stretches from the books they reviewed
- ☐ identify with characters in the books they reviewed
- ☐ privilege style over plot when evaluating novels
- ☐ compare the books they reviewed to the literature of earlier periods
- ☐ pay close attention to illustrations in the books they reviewed

Select one answer choice.

Interval	Frequency
10–19	3
20–29	6
30–39	10
40–49	1
50–59	2

Twenty-two measurements are grouped as shown in the frequency distribution.

Quantity A

The range of the 22 measurements

Quantity B

40

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

n and k are integers greater than 1 for which $\sqrt{n^k} = (n^{13}) \sqrt{n}$.

Quantity A

k

Quantity B

14

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

$$1 < x + y$$

Quantity A

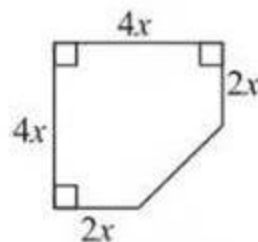

$$x^2 + y^2$$

Quantity B

$$1$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

S equals the area of a square region (not shown) with sides of length $2x$.

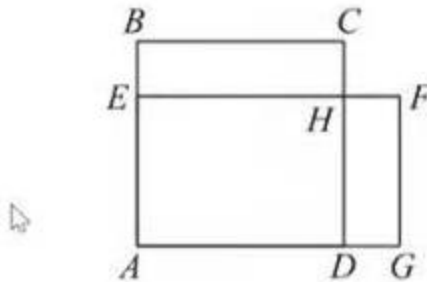

Quantity A

The area of the region enclosed by the pentagon shown

Quantity B

$$\frac{7}{2}S$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

$ABCD$ is a square, $AEFG$ is a rectangle, and $BE = DG$.

Quantity A

The area of square $ABCD$

Quantity B

The area of rectangle $AEFG$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

46, 62, 28, 35, 37, 14, 23, 20, 50

For the set of data above, the arithmetic mean is 35. What is the difference between the mean and the median of the data?

- ☐ 0
- ☐ 1
- ☐ 2
- ☐ 7
- ☐ 11

Select one answer choice.

If $x = 2y - 3$, then $y - 1 =$

☐ $\frac{x-1}{2}$

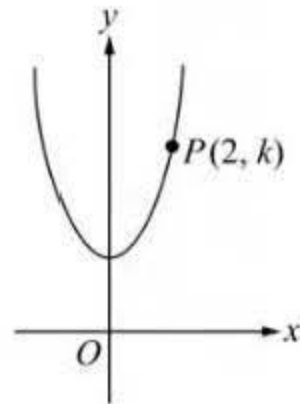

☐ $\frac{x}{2}$

☒ $\frac{x+1}{2}$

☐ $\frac{x+3}{2}$

☐ $\frac{x+5}{2}$

Select one answer choice.

The graph of $y = x^2 + 3$ in the xy -plane is shown in the figure. What is the distance between point P and the point where the graph intersects the y -axis?

- ☐ 6 ☐ 7 ☐ $2\sqrt{5}$ ☐ $2\sqrt{7}$ ☐ $3\sqrt{3}$

Select one answer choice.

On a certain radio tower, a light flashes for 1 second once every 8 seconds, and a light on a certain television tower flashes for 1 second once every 6 seconds. If the radio tower light flashes at exactly 4:00:00 P.M. and the television tower light flashes exactly 4 seconds later, how many times will the two lights flash at the same time between 4:00:00 P.M. and 4:03:37 P.M.?

- ☐ 0
- ☐ 6
- ☐ 9
- ☐ 24

Questions 5 and 6 are based on this passage.

How well is industry doing at recycling metals? One metric sometimes used for answering the question is recycled content, which describes the share of scrap metal in overall production and is important in getting a sense of the magnitude of secondary supply. However, recycled content does not distinguish between new (yield loss from fabrication and manufacturing) and old (postconsumer) scrap as input material, making it vulnerable to artificially increased rates based solely on preconsumer sources. That is, a focus on recycled content may give fabricators incentives to increase their scrap output to meet secondary demand, inadvertently promoting inefficiencies in fabrication and manufacturing. What primarily needs to be encouraged is, instead, the collection and processing of old scrap for recycling.

It can be inferred from the passage that a rise in the recycled content of industrial production

- ☐ does not necessarily indicate that the proportion of scrap in overall production is higher
- ☐ does not necessarily reflect an increase in the recycling of scrapped metal-containing products
- ☐ indicates that fabricators no longer need incentives to use scrap as input material
- ☐ indicates that fabricators are actively promoting the use of postconsumer scrap as input material
- ☐ indicates that fabricators are decreasing their yield loss despite greater secondary demand

Select one answer choice.

Questions 5 and 6 are based on this passage.

How well is industry doing at recycling metals? One metric sometimes used for answering the question is recycled content, which describes the share of scrap metal in overall production and is important in getting a sense of the magnitude of secondary supply. However, recycled content does not distinguish between new (yield loss from fabrication and manufacturing) and old (postconsumer) scrap as input material, making it vulnerable to artificially increased rates based solely on preconsumer sources. That is, a focus on recycled content may give fabricators incentives to increase their scrap output to meet secondary demand, inadvertently promoting inefficiencies in fabrication and manufacturing. What primarily needs to be encouraged is, instead, the collection and processing of old scrap for recycling.

It can be inferred from the passage that greater efficiency in fabrication and manufacturing could result in

- ☐ a decrease in the amount of preconsumer scrap available
- ☐ a decrease in the amount of postconsumer scrap available
- ☐ an increase in the magnitude of the secondary supply
- ☐ an increase in the recycled content of industrial production
- ☐ an increase in the yield loss from fabrication and manufacturing

Select one answer choice.

Questions 7 to 9 are based on this passage.

During the Early and Middle Ming periods in China (1368–1522), most private maritime enterprise was outlawed as piracy by the imperial government. The result was armed conflict between private traders and government forces as well as a gap in the supply of Chinese export wares into the overseas market during the Early Ming period. It is tempting to envision the tension between the private traders and the imperial government during the Early and Middle Ming periods as a conflict between two ideologies: an entrepreneurial spirit versus an agrarian society's conservative Confucian cosmology that despised commerce and material indulgence. A careful examination of the historical events within the empires, however, reveals that this binary view would be an oversimplification, since the tension likely created factions within the Ming bureaucracy. For instance, Governor Zhu Wan's heavy-handed crackdown on Shuangyu Island (the hub of middle Ming-period international piracy) seems to have damaged the commercial interests of so many powerful players in the Ming bureaucracy that they were able to impeach him (after which he committed suicide). Archaeological evidence indicates that there was a flood of Chinese blue-and-white porcelain to the overseas market after 1488. In contrast, an account written by Cui Bo, a Korean scholar official who was shipwrecked on the coast of Ningbo, reveals no signs of a relaxation of the maritime ban at the level of coastal defense. One can conjecture that those responsible for enforcing the maritime ban probably

The primary purpose of the passage is to

- ☐ describe the tension between two ideologies
- ☐ analyze the nature of a historical antagonism
- ☐ question the relevance of certain evidence
- ☐ reveal the inconsistencies of a popular theory
- ☐ defend the importance of historical research

Select one answer choice.

Questions 7 to 9 are based on this passage.

was armed conflict between private traders and government forces as well as a gap in the supply of Chinese export wares into the overseas market during the Early Ming period. It is tempting to envision the tension between the private traders and the imperial government during the Early and Middle Ming periods as a conflict between two ideologies: an entrepreneurial spirit versus an agrarian society's conservative Confucian cosmology that despised commerce and material indulgence. A careful examination of the historical events within the empires, however, reveals that this binary view would be an oversimplification, since the tension likely created factions within the Ming bureaucracy. For instance, Governor Zhu Wan's heavy-handed crackdown on Shuangyu Island (the hub of middle Ming-period international piracy) seems to have damaged the commercial interests of so many powerful players in the Ming bureaucracy that they were able to impeach him (after which he committed suicide). Archaeological evidence indicates that there was a flood of Chinese blue-and-white porcelain to the overseas market after 1488. In contrast, an account written by Cui Bo, a Korean scholar official who was shipwrecked on the coast of Ningbo, reveals no signs of a relaxation of the maritime ban at the level of coastal defense. One can conjecture that those responsible for enforcing the maritime ban probably benefited from turning a blind eye to illicit trade under their jurisdiction.

The primary purpose of the passage is to

- ☐ describe the tension between two ideologies
- ☐ analyze the nature of a historical antagonism
- ☐ question the relevance of certain evidence
- ☐ reveal the inconsistencies of a popular theory
- ☐ defend the importance of historical research

Select one answer choice.

Questions 7 to 9 are based on this passage.

During the Early and Middle Ming periods in China (1368–1522), most private maritime enterprise was outlawed as piracy by the imperial government. The result was armed conflict between private traders and government forces as well as a gap in the supply of Chinese export wares into the overseas market during the Early Ming period. It is tempting to envision the tension between the private traders and the imperial government during the Early and Middle Ming periods as a conflict between two ideologies: an entrepreneurial spirit versus an agrarian society's conservative Confucian cosmology that despised commerce and material indulgence. A careful examination of the historical events within the empires, however, reveals that this binary view would be an oversimplification, since the tension likely created factions within the Ming bureaucracy. For instance, Governor Zhu Wan's heavy-handed crackdown on Shuangyu Island (the hub of middle Ming-period international piracy) seems to have damaged the commercial interests of so many powerful players in the Ming bureaucracy that they were able to impeach him (after which he committed suicide). Archaeological evidence indicates that there was a flood of Chinese blue-and-white porcelain to the overseas market after 1488. One can conjecture that those responsible for enforcing the maritime ban probably

The author mentions "two ideologies" primarily in order to

- ☐ contrast the popular beliefs of a particular time period in Chinese history
- ☐ identify the main source of tension between two groups of people
- ☐ describe the economic and geopolitical context of a historical event
- ☐ mention a plausible but ultimately inadequate explanation for a phenomenon
- ☐ refute a widely held view about the consequences of a conflict

Select one answer choice.

Questions 7 to 9 are based on this passage.

During the Early and Middle Ming periods in China (1368–1522), most private maritime enterprise was outlawed as piracy by the imperial government. The result was armed conflict between private traders and government forces as well as a gap in the supply of Chinese export wares into the overseas market during the Early Ming period. It is tempting to envision the tension between the private traders and the imperial government during the Early and Middle Ming periods as a conflict between two ideologies: an entrepreneurial spirit versus an agrarian society's conservative Confucian cosmology that despised commerce and material indulgence. A careful examination of the historical events within the empires, however, reveals that this binary view would be an oversimplification, since the tension likely created factions within the Ming bureaucracy. For instance, Governor Zhu Wan's heavy-handed crackdown on Shuangyu Island (the hub of middle Ming-period international piracy) seems to have damaged the commercial interests of so many powerful players in the Ming bureaucracy that they were able to impeach him (after which he committed suicide). Archaeological evidence indicates that there was a flood of Chinese blue-and-white porcelain to the overseas market after 1488. In contrast, an account written by Cui Bo, a Korean scholar official who was shipwrecked on the coast of Ningbo, reveals no signs of a relaxation of the maritime ban at the level of coastal defense. One can conjecture that those responsible for enforcing the maritime ban probably

Which of the following best describes the organization of the passage?

- ☐ A conflict is described and some of its ramifications are explored.
- ☐ A hypothesis is proposed and the credibility of the evidence typically used to support it is questioned.
- ☐ A phenomenon is considered and the accounts of the historical events surrounding it are discussed.
- ☐ A view is presented and an argument that suggests its deficiency is given.
- ☐ A controversy is explained and the strengths and weaknesses of both sides are considered.

Select one answer choice.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

The sum of money needed to pay for the additional vaccines may not sound _____, but for developing countries even a small increase in the health care budget may prove a very big drain on resources.

- ☐ burdensome
- ☐ paltry
- ☐ negligible
- ☐ onerous
- ☐ sufficient
- ☐ adequate

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Methane that is oxidized to diamond is thought to originate from reduced fluids in Earth' s upper mantle; the ultimate origin of carbon in diamonds, however, is _____.

- ☐ obscure
- ☐ mysterious
- ☐ contentious
- ☐ crucial
- ☐ forgotten
- ☐ intriguing

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

In contrast to today, when many readers consider the moral sentiments expressed in the ancient writer' s work to be quite sophomoric, in the writer' s own time, these sentiments were regarded as remarkably _____.

- ☐ abstruse
- ☐ misguided
- ☐ insightful
- ☐ ill conceived
- ☐ sagacious
- ☐ sanguine

Select two answer choices.

Question 13 is based on this passage.

Treasure hunters as well as archaeologists seek out remains of ancient settlements in central Asia. When treasure hunters find a site, they generally destroy much valuable archaeological information in the process of removing artifacts that they can sell. Guarding the area where unexcavated sites might be found is impossible. Therefore, there is no way to preserve the archaeological value of unexcavated sites unless they can be found and excavated quickly.

Which of the following, if true, most strongly supports the argument?

- ☐ Once treasure hunters have found an ancient settlement, they generally find and extract from it all of the artifacts that have any cash value.
- ☐ No measures that can be adopted have a realistic chance of convincing treasure hunters that they would be unable to obtain a worthwhile price for artifacts removed from ancient settlements.
- ☐ There is currently adequate funding available, from government and private sources, for efforts to accelerate archaeological exploration in central Asia.
- ☐ Although several months are usually needed for a thorough archaeological investigation of an ancient settlement, more sophisticated technology is becoming available to reduce that time.
- ☐ In comparison with archaeologists, treasure hunters have less sophisticated techniques and equipment available for locating sites for excavation.

Select one answer choice.

Questions 14 and 15 are based on this passage.

Until recently, study of motor control in amphibian feeding was limited to a few model taxa (taxonomic groups), for example, toads (genus *Bufo*), frogs (*Rana*), and salamanders (*Ambystoma*). Studies of these taxa suggested that amphibian feeding in general is highly stereotyped, that is, performed in much the same way every time, with little variation in the timing or extent of movements. However, recent studies of a great variety of salamanders, frogs, and caecilians (tropical amphibians) have revealed that the model taxa are probably exceptions among amphibians, and were unfortunate models on which to base generalizations about amphibian feeding. Indeed, *Bufo* is now known to be one of the most stereotyped amphibians in its feeding movements, and *Ambystoma* lies at the low end of variation for salamanders.

The primary purpose of the passage is to

- ☐ identify certain previously overlooked factors that affect amphibian feeding
- ☐ present evidence that casts doubt on a previously accepted hypothesis concerning amphibian feeding
- ☐ evaluate a number of recent studies that examine feeding habits among amphibians
- ☐ explain the evidence supporting the claim that amphibian feeding is highly stereotyped
- ☐ contrast two hypotheses about the degree of variation in the timing and extent of movements evident in amphibian feeding

Questions 14 and 15 are based on this passage.

Until recently, study of motor control in amphibian feeding was limited to a few model taxa (taxonomic groups), for example, toads (genus *Bufo*), frogs (*Rana*), and salamanders (*Ambystoma*). Studies of these taxa suggested that amphibian feeding in general is highly stereotyped, that is, performed in much the same way every time, with little variation in the timing or extent of movements. However, recent studies of a great variety of salamanders, frogs, and caecilians (tropical amphibians) have revealed that the model taxa are probably exceptions among amphibians, and were **unfortunate** models on which to base generalizations about amphibian feeding. Indeed, *Bufo* is now known to be one of the most stereotyped amphibians in its feeding movements, and *Ambystoma* lies at the low end of variation for salamanders.

In the context in which it appears, “unfortunate” most nearly means

- ☐ deplorable
- ☐ unwarranted
- ☐ unsuccessful
- ☐ inconvenient
- ☐ infelicitous
