- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

The cost r , in dollars, of an order of m cardboard boxes is given by $r = 0.55m + 14.00$.
What is the number of cardboard boxes in an order that costs \$212.00?

cardboard boxes

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

Questions 6 to 8 are based on the following data.

In a survey of 2,500 companies, each company gave one of the following three responses: plan to make an acquisition within 1 year, plan to make an acquisition after 1 year, and no plan to make an acquisition.

**Distribution of the Companies Surveyed,
by Response**

**For the Companies Planning to Make
an Acquisition, Percent of
Companies Giving Each Reason**

Reason	Percent
Acquire competition	52%
Geographic diversity	20%
Growth	85%
Product diversity	48%
Technological advantage	22%

How many of the companies planning to make an acquisition gave the reason that was given by the least number of such companies?

☐ 175☐ 300☐ 450☐ 500☐ 600

Select one answer choice.

Questions 6 to 8 are based on the following data.

In a survey of 2,500 companies, each company gave one of the following three responses: plan to make an acquisition within 1 year, plan to make an acquisition after 1 year, and no plan to make an acquisition.

Questions 4 and 5 are based on this passage.

Just as in many other societies, self-help texts dealing with relationships are widely sold in Mexican cities. Their widespread circulation indicates Mexicans' desire for guidance on matters of family life and other relationships in a cultural environment characterized by the erosion of traditional patriarchal cultural models. On the one hand, the widely varying accounts of and prescriptions for family life provided by these texts may be understood as reflections of the increasingly diverse and often conflicting cultural models of family life in urban Mexico. On the other hand, self-help texts may also play an important role in shaping these cultural models, insofar as they provide a substantial number of contemporary urban Mexicans with cultural options for making sense of their closest relationships.

The primary purpose of the passage is to

- ☐ offer an alternative to prevailing interpretations of the role of self-help texts in the lives of urban Mexicans
- ☐ reflect on the significance of the popularity of self-help texts in urban Mexico
- ☐ show how self-help texts have taken a different form in urban Mexico than in other societies
- ☐ argue that self-help texts in urban Mexico promote a collective model of family life
- ☐ explain how self-help texts have influenced the way people conduct relationships in urban Mexico

Select one answer choice.

Questions 4 and 5 are based on this passage.

Just as in many other societies, self-help texts dealing with relationships are widely sold in Mexican cities. Their widespread circulation indicates Mexicans' desire for guidance on matters of family life and other relationships in a cultural environment characterized by the erosion of traditional patriarchal cultural models. On the one hand, the widely varying accounts of and prescriptions for family life provided by these texts may be understood as reflections of the increasingly diverse and often conflicting cultural models of family life in urban Mexico. On the other hand, self-help texts may also play an important role in shaping these cultural models, insofar as they provide a substantial number of contemporary urban Mexicans with cultural options for making sense of their closest relationships.

The author mentions the "erosion of traditional patriarchal cultural models" primarily in order to

- ☐ identify an exception to the phenomenon described in the first sentence
- ☐ point out a change brought about by the phenomenon described in the first sentence
- ☐ highlight a development that facilitated the phenomenon described in the first sentence
- ☐ provide a reason why the two interpretations offered in the passage are equally likely
- ☐ mention a condition that favors one of the two interpretations offered in the passage over the other

Select one answer choice.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Tao Zhu and Yaobin Lu found that personality traits can affect user adoption of mobile commerce, suggesting that a mobile service provider could benefit from _____ the market, specifically targeting extroverts, for instance.

☐ partitioning

☐ saturating

☐ blanketing

☐ cornering

☐ penetrating

☐ segmenting

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Theses defended by contemporary philosophers under the banner of metaphysics typically _____ the claims of science; that is, they cannot be borne out by experiment as the claims of science are expected to be.

- ☐ derive from
- ☐ originate in
- ☐ contravene
- ☐ challenge
- ☐ transcend
- ☐ go beyond

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Another challenge to biologists and land-use planners alike is that while human-induced changes to the landscape are sometimes _____, they can nevertheless drastically alter the habitat for some plants and animals.

- ☐ indisputable
- ☐ inappropriate
- ☐ unacceptable
- ☐ unfathomable
- ☐ imperceptible
- ☐ indiscernible

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Human hearing is remarkably _____: an attentive listener knows if a band's drummer is as little as one thousandths of a second late on the beat.

- ☐ sophisticated
- ☐ adaptable
- ☐ independent
- ☐ sensitive
- ☐ versatile
- ☐ discerning

Select two answer choices.

Questions 10 to 12 are based on this passage.

The standard way to hard-boil eggs—ten minutes in boiling water—is far from ideal, according to physical chemist Hervé This. Egg whites and yolks are made up of protein and water; yolks contain fat as well. As eggs cook, their balled-up proteins uncoil into strands, and the strands bind together to form an intricate mesh that traps water. In essence, the proteins form a gel, a liquid dispersed in a solid. Boiling causes too many egg proteins to bind and form dense meshes, yielding rubbery egg whites and sandy, grayish yolks.

But exploiting egg-protein chemistry allows egg cooking to be very precisely calibrated. Ovotransferrin, the first of the egg-white proteins to uncoil, begins to set at around 61°C . Ovalbumin, the most abundant egg-white protein, coagulates at 84°C . Yolk proteins mostly fall in between, with most starting to solidify when they approach 70°C . Using a laboratory oven, Dr. This cooks eggs at 65°C for about an hour, timing not being critical. The results, with the whites delicately set and the yolks still orange and soft, make it clear why 65-degree eggs are becoming the rage among chefs in France. (Salmonella cannot survive more than a few minutes at 60°C , so a 65-degree egg cooked for an hour should be quite safe.)

In the context of the passage, the highlighted sentence presents

- ☐ an undesirable consequence that can be avoided by adopting a particular method
- ☐ the fundamental process that underlies the subject matter of the passage
- ☐ the new insight that allowed an improved process to be conceived
- ☐ an explanation for why an established method is seriously defective
- ☐ the method that was used prior to the work the passage describes

Select one answer choice.

Questions 10 to 12 are based on this passage.

The standard way to hard-boil eggs—ten minutes in boiling water—is far from ideal, according to physical chemist Hervé This. Egg whites and yolks are made up of protein and water; yolks contain fat as well. As eggs cook, their balled-up proteins uncoil into strands, and the strands bind together to form an intricate mesh that traps water. In essence, the proteins form a gel, a liquid dispersed in a solid. Boiling causes too many egg proteins to bind and form dense meshes, yielding rubbery egg whites and sandy, grayish yolks.

But exploiting egg-protein chemistry allows egg cooking to be very precisely calibrated. Ovotransferrin, the first of the egg-white proteins to uncoil, begins to set at around 61°C . Ovalbumin, the most abundant egg-white protein, coagulates at 84°C . Yolk proteins mostly fall in between, with most starting to solidify when they approach 70°C . Using a laboratory oven, Dr. This cooks eggs at 65°C for about an hour, timing not being critical. The results, with the whites delicately set and the yolks still orange and soft, make it clear why 65-degree eggs are becoming the rage among chefs in France. (Salmonella cannot survive more than a few minutes at 60°C , so a 65-degree egg cooked for an hour should be quite safe.)

It can be inferred from the passage that in a 65-degree egg

- ☐ the ovotransferrin has not yet formed a gel
- ☐ the yolk has not reached as high a temperature as the white
- ☐ most of the yolk proteins have started to solidify
- ☐ most of the ovalbumin remains balled up
- ☐ the fats in the yolk have not undergone any change

Select one answer choice.

Questions 10 to 12 are based on this passage.

The standard way to hard-boil eggs—ten minutes in boiling water—is far from ideal, according to physical chemist Hervé This. Egg whites and yolks are made up of protein and water; yolks contain fat as well. As eggs cook, their balled-up proteins uncoil into strands, and the strands bind together to form an intricate mesh that traps water. In essence, the proteins form a gel, a liquid dispersed in a solid. Boiling causes too many egg proteins to bind and form dense meshes, yielding rubbery egg whites and sandy, grayish yolks.

But exploiting egg-protein chemistry allows egg cooking to be very precisely calibrated. Ovotransferrin, the first of the egg-white proteins to uncoil, begins to set at around 61°C . Ovalbumin, the most abundant egg-white protein, coagulates at 84°C . Yolk proteins mostly fall in between, with most starting to solidify when they approach 70°C . Using a laboratory oven, Dr. This cooks eggs at 65°C for about an hour, timing not being critical. The results, with the whites delicately set and the yolks still orange and soft, make it clear why 65-degree eggs are becoming the rage among chefs in France. (Salmonella cannot survive more than a few minutes at 60°C , so a 65-degree egg cooked for an hour should be quite safe.)

It can be inferred from the passage that Hervé This would likely agree that in cooking eggs it is best to

- ☐ cause certain of the proteins to uncoil
- ☐ prevent the proteins from forming a gel
- ☐ pay more attention to the whites than the yolks
- ☐ precisely control both time and temperature
- ☐ ensure that fats and proteins are all transformed

Select one answer choice.

The product of the positive integers a and b is greater than 4 and less than 20.

Quantity A

The product of a and b

Quantity B

The sum of a and b

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Square $ABCD$ is divided into four triangles as shown.

Quantity A

$$90 - x$$

Quantity B

$$y$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Quantity A

The number of even integers n such that $|n - 30| < 6$

Quantity B

5

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

A certain desk calendar shows the number of the day of the year and the number of days remaining in the year. If the calendar shows $1/364$ for Saturday, January 1, what does the calendar show for the Tuesday that is 20 weeks after the first Tuesday in January?

☐ $21/344$

☐ $141/224$

☐ $142/223$

☐ $143/222$

☐ $144/221$

Select one answer choice.

In the figure above, what is the value of a ?

- ☐ $\frac{\sqrt{3}}{2}$ ☐ $\sqrt{3}$ ☐ 2 ☐ $2\sqrt{3}$ ☐ 4

Select one answer choice.

A sequence of numbers $P_1, P_2, P_3, \dots, P_n, \dots$ is defined as follows: $P_1 = 1$, $P_2 = 2$, and $P_n = 4 \frac{P_{n-1}}{P_{n-2}}$ for each integer n greater than 2. What is the value of P_4 ?

- ☐ 4
- ☐ 6
- ☐ 12
- ☐ 16
- ☐ 24

Select one answer choice.

The circle graph above shows the results of a survey conducted at a high school in which each student was asked to name one favorite sport, if any. Of the students who named a favorite sport, what percent of students named either baseball or hockey?

- ☐ 15.75%
- ☐ 21%
- ☐ 28%
- ☐ 31.5%
- ☐ 42%

Select one answer choice.

If $x < y$, which of the following must be true?

- ☐ $2x < y$
- ☐ $2x > y$
- ☐ $x^2 < y^2$
- ☐ $2x - y < y$
- ☐ $2x - y < 2xy$

Select one answer choice.

The operations $\oplus$ and $\otimes$ are defined for all numbers x and y by

$$x \oplus y = 2x - y \text{ and}$$

$$x \otimes y = x + 3y.$$

If $3 \oplus (2z) = z \otimes 6$, what is the value of z ?

$$z = \boxed{}$$

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

Greg's weekly salary is \$187, which is 15 percent less than Karla's weekly salary. If Karla's weekly salary increases by 10 percent, by what percent must Greg's weekly salary increase in order to equal Karla's new weekly salary?

Give your answer to the nearest tenth of a percent.

%

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

A sales representative's monthly earnings consist of a base salary of \$3,500 plus a commission equal to 5 percent of monthly sales in excess of \$50,000. If monthly sales total s dollars and $s > 50,000$, what are the sales representative's monthly earnings in terms of s , in dollars?

- ☐ $0.05s + 1,000$
- ☐ $0.05s + 3,500$
- ☐ $0.05(s - 3,500)$
- ☐ $0.05(s - 50,000)$
- ☐ $0.05(s - 53,500)$

Select one answer choice.

In a group of 150 people, 40 percent are older than 60 years and 80 percent are employed. Which of the following could be the number of people who are both employed and older than 60 years?

Indicate all such numbers.

☐ 22

☐ 28

☐ 32

☐ 45

☐ 56

☐ 64

Select one entry for the blank. Fill the blank in the way that best completes the text.

Unlike some mammals—cows and sheep, for instance—that are notably _____, lions have a wide range of facial expressions.

tractable
impassive
solitary
social
sluggish

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

When the United States government created the Post Office at the founding of the republic, it didn't invite rival postal firms to compete; in fact, it created a monopoly. That monopoly, however, was (i) _____ free expression because of the policies Congress adopted, which (ii) _____ the circulation of newspapers irrespective of their viewpoint and spread postal service throughout the country.

Blank (i)

conducive to
threatened by
dependent on

Blank (ii)

subsidized
limited
trivialized

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

One disadvantage of reading (i)_____ accounts of historical events is that the textual (ii)_____ often lead to abrupt transitions and (iii)_____ references.

Blank (i)

straightforward
condensed
lucid

Blank (ii)

additions
alterations
redundancies

Blank (iii)

explicit
copious
unexplained

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Each memoir must (i)_____ by making an implicit claim that the life of its author is somehow (ii)_____. Thus, if the reader begins to experience a memoir as too (iii)_____, the memoir has lost its reason for being.

Blank (i)

justify its existence
assert its authenticity
explain its context

Blank (ii)

meritorious
influential
unique

Blank (iii)

clumsy
mundane
abstruse

Questions 5 and 6 are based on this passage.

Scholars often attribute the emergence of a new conception of women writers as literary artists to elite, male-dominated venues like the *Atlantic Monthly*, which gained influence during the 1860s and 1870s. The careers of Mary Gibson and other women writing during the 1850s, however, suggest a different account of the transformation of American female authorship—pushing its inception into the antebellum period and locating its origins in more popular venues. Far from waiting for the elite imprimatur of the *Atlantic*, writers like Gibson took advantage of the opportunities for publication provided by midcentury story papers (periodicals containing popular fiction). Women supplied much of the material for story papers and, in the process, presented striking images of female authorship and artistry to thousands of readers.

The author of the passage would most likely agree with which of the following statements about writers like Gibson?

- ☐ They were the primary audience for midcentury story papers.
- ☐ They were inspired by the female authors who wrote prior to the antebellum period.
- ☐ They were publicly committed to advancing the image of female writers as literary artists.
- ☐ They were less dependent on elite publications than many accounts of female authorship suggest.
- ☐ They read more widely than most scholars of antebellum female authorship tend to acknowledge.

Select one answer choice.

Questions 5 and 6 are based on this passage.

Scholars often attribute the emergence of a new conception of women writers as literary artists to elite, male-dominated venues like the *Atlantic Monthly*, which gained influence during the 1860s and 1870s. The careers of Mary Gibson and other women writing during the 1850s, however, suggest a different account of the transformation of American female authorship—pushing its inception into the antebellum period and locating its origins in more popular venues. Far from waiting for the elite imprimatur of the *Atlantic*, writers like Gibson took advantage of the opportunities for publication provided by midcentury story papers (periodicals containing popular fiction). Women supplied much of the material for story papers and, in the process, presented striking images of female authorship and artistry to thousands of readers.

Which statement best describes the function of the highlighted sentence?

- ☐ It describes a mainstream view with which the author takes issue.
- ☐ It acknowledges evidence in favor of a position that the author opposes.
- ☐ It introduces the central claim that the author hopes to prove.
- ☐ It summarizes a scholarly dispute that the author attempts to resolve.
- ☐ It provides historical evidence that the author seeks to explain.

Select one answer choice.

Questions 7 to 9 are based on this passage.

In the 1920s, the Legal Realists, a group of constitutional scholars, challenged “formalism,” the then-dominant style of legal reasoning in the United States. Proponents of formalism, believing that neither personal experiences nor a case’s social implications should shape a judge’s ruling, urged judges to decide difficult new cases by applying to such cases general principles deduced from the decisions of previous courts in similar instances. Legal Realists insisted that judges’ decisions were influenced by the social implications of a decision and by life experiences, the latter inevitably coloring judges’ perceptions of a case’s parties and witnesses and thus of its “facts,” and that the legal principles derivable from previous decisions in similar instances were so inconsistent that such principles were likely to result in very different rulings. Thus, Legal Realists argued that legal principles, to be meaningful and useful, could not be general and abstract, but must instead refer to specific circumstances. Principles appropriate to deciding one case involving contracts might not be for another because contracts are entered into and enforced in widely different circumstances.

The primary purpose of the passage is to

- ☐ chronicle the development in the United States of a particular approach to judicial decision-making
- ☐ point out differences between two approaches to judicial decision-making in the United States
- ☐ suggest that two approaches to judicial decision-making in the United States are not as contradictory as they may appear to be
- ☐ explain how a particular approach to judicial decision-making has reshaped the decision-making behavior of judges in the United States
- ☐ show that one approach to judicial decision-making in the United States is superior to another

Select one answer choice.

Questions 7 to 9 are based on this passage.

In the 1920s, the Legal Realists, a group of constitutional scholars, challenged “formalism,” the then-dominant style of legal reasoning in the United States. Proponents of formalism, believing that neither personal experiences nor a case’s social implications should shape a judge’s ruling, urged judges to decide difficult new cases by applying to such cases general principles deduced from the decisions of previous courts in similar instances. Legal Realists insisted that judges’ decisions were influenced by the social implications of a decision and by life experiences, the latter inevitably coloring judges’ perceptions of a case’s parties and witnesses and thus of its “facts,” and that the legal principles derivable from previous decisions in similar instances were so inconsistent that such principles were likely to result in very different rulings. Thus, Legal Realists argued that legal principles, to be meaningful and useful, could not be general and abstract, but must instead refer to specific circumstances. Principles appropriate to deciding one case involving contracts might not be for another because contracts are entered into and enforced in widely different circumstances.

According to the passage, Legal Realists determined the usefulness of legal principles on the basis of which of the following?

- ☐ Their applicability to a wide variety of circumstances
- ☐ Their relevance to the circumstances of the cases to which they were applied
- ☐ The ease with which they were derived from the decisions of previous courts in similar cases
- ☐ The extent to which they were helpful in identifying similarities among seemingly disparate cases
- ☐ The extent to which they were colored by the personal experiences of the judges deducing them

Select one answer choice.

Questions 7 to 9 are based on this passage.

In the 1920s, the Legal Realists, a group of constitutional scholars, challenged “formalism,” the then-dominant style of legal reasoning in the United States. Proponents of formalism, believing that neither personal experiences nor a case’s social implications should shape a judge’s ruling, urged judges to decide difficult new cases by applying to such cases general principles deduced from the decisions of previous courts in similar instances. Legal Realists insisted that judges’ decisions were influenced by the social implications of a decision and by life experiences, the latter inevitably coloring judges’ perceptions of a case’s parties and witnesses and thus of its “facts,” and that the legal principles derivable from previous decisions in similar instances were so inconsistent that such principles were likely to result in very different rulings. Thus, Legal Realists argued that legal principles, to be meaningful and useful, could not be general and abstract, but must instead refer to specific circumstances. Principles appropriate to deciding one case involving contracts might not be for another because contracts are entered into and enforced in widely different circumstances.

Which of the following best describes the relationship of the final sentence of the passage to the sentence that precedes it?

- ☐ The final sentence illustrates a generalization made in the preceding sentence.
- ☐ The final sentence offers an exception to the generalization made in the preceding sentence.
- ☐ The final sentence evaluates a conclusion presented in the preceding sentence.
- ☐ The final sentence corrects an assertion made in the preceding sentence.
- ☐ The final sentence comments on an example presented in the preceding sentence.

Select one answer choice.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

While the band's music is loud and aggressive, it is never _____.

- ☐ simpleminded
- ☐ unsophisticated
- ☐ subdued
- ☐ restrained
- ☐ melodious
- ☐ disingenuous

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Community gardens are frequently considered _____ since they are often established on land that does not belong to the gardens' creators and is therefore subject at any time to being reappropriated.

- ☐ cooperative
- ☐ quixotic
- ☐ ephemeral
- ☐ heterogeneous
- ☐ diverse
- ☐ transitory

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Researchers studying India's monsoon weather have evaluated more than 100 years of rain gauge data; _____ such information, South American scientists are forced to reconstruct centuries of monsoon history by analyzing lake-bottom sediment cores.

- ☐ verifying
- ☐ lacking
- ☐ utilizing
- ☐ employing
- ☐ wanting
- ☐ confirming

Select two answer choices.

Question 13 is based on this passage.

Articles in scientific journals published in the United States characteristically cite only articles written in English. This is not **b** use there are no interesting scientific developments that are reported in other languages only, but because of a basic linguistic ignorance on the part of scientists in the United States. This ignorance, therefore, will certainly result in a failure of United States scientists to benefit from scientific progress made outside the United States.

Which of the following, if true, would most strongly support the conclusion of the argument given?

- ☐ Scientists outside the United States usually read English-language scientific journals.
- ☐ Reports of important scientific findings are usually translated into English.
- ☐ The linguistic ignorance of United States scientists is a symptom of a more general ignorance of foreign languages in the United States.
- ☐ Many experiments reported in United States scientific journals are unintentional repetitions of experiments earlier reported in languages other than English.
- ☐ The value of a particular scientific development is independent of the language in which it is reported.

Select one answer choice.

Questions 14 and 15 are based on this passage.

In the United States, studying the territoriality of nonnative ants such as the red fire ant, a species native to South America, may seem unlikely to yield generalizable results—but it does have distinct advantages. Most importantly, whereas the fire ant shares habitat with many ant competitors in South America, its communities in the United States are much simpler. Colonizable landscape is blanketed almost continuously with fire ant territories, so all territorial boundaries are with other fire ant colonies. We can study the complexities of territoriality in almost pure, continuous populations of a single species, without the complicating influences of other competitors. Furthermore, the high densities of many fire ant populations ensure that interactions among competing colonies will be intense and obvious.

The primary function of the highlighted sentence is to

- ☐ provide evidence that helps explain the success of the red fire ant in the United States
- ☐ identify a feature of red fire ant colonies in the United States that makes them appealing to researchers
- ☐ suggest why red fire ant colonies have been so damaging in many regions of the United States
- ☐ explain why researchers feel that studying the territoriality of red fire ants in the United States may yield problematic results
- ☐ suggest a reason for the absence of competitors to the red fire ant in the United States

Select one answer choice.

Questions 14 and 15 are based on this passage.

In the United States, studying the territoriality of nonnative ants such as the red fire ant, a species native to South America, may seem unlikely to yield generalizable results—but it does have distinct advantages. Most importantly, whereas the fire ant shares habitat with many ant competitors in South America, its communities in the United States are much simpler. Colonizable landscape is blanketed almost continuously with fire ant territories, so all territorial boundaries are with other fire ant colonies. We can study the complexities of territoriality in almost pure, continuous populations of a single species, without the complicating influences of other competitors. Furthermore, the high densities of many fire ant populations ensure that interactions among competing colonies will be intense and obvious.

Consider each of the choices separately and select all that apply.

The author implies that red fire ants in the United States differ from red fire ants in South America in the extent to which ants in the two environments

- ☐ dominate their habitat
- ☐ interact with other red fire ant colonies
- ☐ have had their territorial behavior studied by researchers

Select one or more answer choices.

section 2	1	2	3	4	5	6	7	8	9	10	11	12			
答案	B	C	D	B	360	B	B	3	A	A,C,D	E	A			
section 3	1	2	3	4	5	6	7	8	9	10	11	12			
答案	D	CA	BBB	B	D	AF	EF	EF	DF	B	D	B			
section 4	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
答案	D	A	C	C	D	E	E	C	D	C	D	-4	29.4	A	C,E,F
section 5	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
答案	B	AA	BBC	ACB	D	A	B	B	A	AB	CF	BE	D	B	AB
