Because it was exposed by a _____ fracture, the rock' s structure could be seen free of weathering or lichen growth.

primeval
complex
recent
microscopic
permanent

Select one answer choice.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

The governor, clearly trying to live down a reputation for (i)_____, has recently demonstrated an unexpected ability to be (ii)_____ when dealing with state legislators.

Blank (i)

elitism
pugnacity
vacillation

Blank (ii)

candid
petulant
conciliatory

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

The journey to (i)_____, when it starts from a vantage as (ii)_____ as Dunsany' s, is often as (iii)_____ as the path to glory. How did a writer of such talent and renown wind up nearly forgotten?

Blank (i)

obscurity
normalcy
genius

Blank (ii)

eminent
reactionary
egalitarian

Blank (iii)

unfathomable
cyclical
mundane

Select one entry from each column.

Questions 4 and 5 are based on this passage.

The emphasis on intimate conversation in political discourse originated with Saul Alinsky (1909–1972) but became American labor leader Cesar Chavez' s (1927–1993) supreme contribution to political theory and practice. Such one-on-one organizing, like the feminist consciousness-raising groups that share its spirit, was promoted not just as a way of discussing politics, but as a way of *doing* politics. Its opposite was political oratory, the great transforming speech before a gathering of listeners. This view was an enormous departure in democratic theory: the leader' s ability to inspire a crowd had long been a touchstone of popular politics, but now such speeches and speechmakers seemed suspect, even essentially undemocratic, because they were frequently full of bombast, and because they talked at the people instead of listening to them.

It can be inferred from the passage that members of "feminist consciousness-raising groups"

- ☐ distanced themselves from a theory that originated with Saul Alinsky
- ☐ typically prioritized conversations about personal issues over political activism
- ☐ developed a specialized rhetorical style that was inaccessible to outsiders
- ☐ considered some traditional modes of political engagement to be inadequate
- ☐ were skeptical about whether political discussion could lead to lasting change

Select one answer choice.

Questions 4 and 5 are based on this passage.

The emphasis on intimate conversation in political discourse originated with Saul Alinsky (1909–1972) but became American labor leader Cesar Chavez' s (1927–1993) supreme contribution to political theory and practice. Such one-on-one organizing, like the feminist consciousness-raising groups that share its spirit, was promoted not just as a way of discussing politics, but as a way of *doing* politics. Its opposite was political oratory, the great transforming speech before a gathering of listeners. This view was an enormous departure in democratic theory: the leader' s ability to inspire a crowd had long been a touchstone of popular politics, but now such speeches and speechmakers seemed suspect, even essentially undemocratic, because they were frequently full of bombast, and because they talked at the people instead of listening to them.

In the context of the passage, the highlighted portion serves primarily to

- ☐ shed light on the validity of a theory
- ☐ question the reasonableness of a claim
- ☐ identify an untenable assumption
- ☐ cast doubt on an outmoded idea
- ☐ highlight the radical nature of an approach

Select one answer choice.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

However much people want to avoid physical pain and feelings of anxiety, both are _____ self-preservation in a dangerous world.

- ☐ compatible with
- ☐ essential for
- ☐ complementary to
- ☐ reliant on
- ☐ indispensable for
- ☐ noteworthy for

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Although Beatrice Webb' s career ostensibly involved _____ shift from philanthropy to social research, her stories suggest that working in nineteenth-century London involved a complex negotiation between the two roles.

- ☐ a painstaking
- ☐ a conservative
- ☐ an exacting
- ☒ a decisive
- ☐ an apprehensive
- ☒ a marked

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

The brain has become, for many people, _____ the biological machinations of the self, and the self-knowledge promised by neuroscience has ignited a hunger to understand how new findings weigh in on age-old questions.

- ☒ tantamount to
- ☒ synonymous with
- ☐ implicated in
- ☐ divorced from
- ☐ detached from
- ☐ subservient to

It' s a sign of John Dramani Mahama' s maturity as a writer that he is willing to consider his country' s future so _____: his memoir is appealingly honest, given to clear-eyed assessments rather than exaggerated accounts of achievements.

- ☐ cheerfully
- ☐ dispassionately
- ☐ insightfully
- ☐ evocatively
- ☐ analytically
- ☐ blithely

Select two answer choices.

Questions 10 to 12 are based on this passage.

Joan Kelly has argued that developments, such as the emergence of capitalism, that expanded men's opportunities during the Renaissance in Europe led to a contraction of women's economic roles. She has difficulty, however, in substantiating her thesis, which rests on a comparison of medieval French life as depicted in medieval French literature with subsequent depictions of Italian life during the Renaissance from Renaissance Italian literature. Quite aside from the problems of comparing literary texts from different countries, literary sources (as Kelly herself admits) can be prescriptive rather than descriptive: they illuminate the attitudes of their authors without necessarily reflecting social realities. In addition, Kelly confined her study to upper-class women and failed to examine laws concerning property and inheritance, which presumably would have provided information about women of all classes. While Kelly sheds much light on male ideals of womanhood, she does not prove that women, patrician or lowerclass, faced increasing economic constraints.

The passage suggests that which of the following is true of Kelly's research?

- ☐ If Kelly had demonstrated that women's economic roles expanded rather than contracted during the Renaissance, she probably would have undermined a widely accepted historical theory.
- ☐ If Kelly had studied medieval and Renaissance literary texts from Italy only, she probably would have concluded that women's economic roles had expanded during the Renaissance.
- ☐ If Kelly had done a study of men's attitudes toward women's economic roles during the Renaissance, she probably would have used different sources in her study of women's actual economic roles during the Renaissance.
- ☐ If Kelly had studied laws concerning property and inheritance, she probably would have obtained information about a broader group of women.
- ☐ If Kelly had realized that literary sources can be prescriptive, she probably would have reached different conclusions in her study.

Select one answer choice.

Questions 10 to 12 are based on this passage.

Joan Kelly has argued that developments, such as the emergence of capitalism, that expanded men's opportunities during the Renaissance in Europe led to a contraction of women's economic roles. She has difficulty, however, in substantiating her thesis, which rests on a comparison of medieval French life as depicted in medieval French literature with subsequent depictions of Italian life during the Renaissance from Renaissance Italian literature. Quite aside from the problems of comparing literary texts from different countries, literary sources (as Kelly herself admits) can be prescriptive rather than descriptive: they illuminate the attitudes of their authors without necessarily reflecting social realities. In addition, Kelly confined her study to upper-class women and failed to examine laws concerning property and inheritance, which presumably would have provided information about women of all classes. While Kelly sheds much light on male ideals of womanhood, she does not prove that women, patrician or lowerclass, faced increasing economic constraints.

It can be inferred from the passage that Kelly intended to use the medieval French sources in her study to provide evidence of

- ☐ societal attitudes toward women's economic roles prior to the Renaissance
- ☐ women's economic roles in France as opposed to women's economic roles in Italy
- ☒ women's economic roles in the medieval period as opposed to women's economic roles during the Renaissance
- ☐ the economic roles of upper-class women as opposed to those of women of other classes
- ☐ the expansion of men's economic opportunities prior to the Renaissance

Select one answer choice.

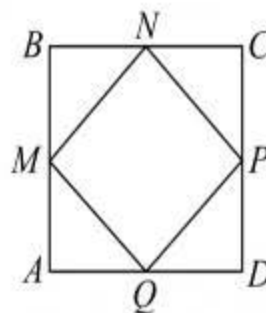

Questions 10 to 12 are based on this passage.

Joan Kelly has argued that developments, such as the emergence of capitalism, that expanded men's opportunities during the Renaissance in Europe led to a contraction of women's economic roles. She has difficulty, however, in substantiating her thesis, which rests on a comparison of medieval French life as depicted in medieval French literature with subsequent depictions of Italian life during the Renaissance from Renaissance Italian literature. Quite aside from the problems of comparing literary texts from different countries, literary sources (as Kelly herself admits) can be prescriptive rather than descriptive: they illuminate the attitudes of their authors without necessarily reflecting social realities. In addition, Kelly confined her study to upper-class women and failed to examine laws concerning property and inheritance, which presumably would have provided information about women of all classes. While Kelly sheds much light on male ideals of womanhood, she does not prove that women, patrician or lowerclass, faced increasing economic constraints.

According to the argument presented by the author of the passage, which of the following, if true, would most strongly support the thesis of Kelly's study?

- ☐ A study that compared male ideals of womanhood in Renaissance France and Italy found that the French held a more restrictive view of women than did the Italians.
- ☐ A study that compared men's and women's attitudes about women's economic roles in Renaissance France and Italy found that the attitudes of the two sexes differed greatly.
- ☐ A study that compared medieval and Renaissance French social structures found that the difference in wealth between the upper and lower classes was greater during the Renaissance.
- ☐ A study that compared medieval and Renaissance inheritance laws in Italy found that women's economic roles were greater in medieval times than during the Renaissance.
- ☐ A study that compared medieval and Renaissance French literary texts found that women characters appeared more frequently in the Renaissance texts than in the medieval texts.

Select one answer choice.

The perimeter of square $ABCD$ is 40, and M , N , P , and Q are the midpoints of its sides.

Quantity A

The perimeter of square $MNPQ$

Quantity B

20

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☒ The relationship cannot be determined from the information given.

Select one answer choice.

n is a positive integer.

Quantity A

$$(n+2)! - n!$$

Quantity B

$$(n+1)!$$

According to one view, works of literary fiction should faithfully reflect social reality, and adherents to this view tend to assume that social reality has only one face: a damaged and dysfunctional one. This view has had less impact on the musical arts, however. Composers are free to write music that is (i)_____ without being condemned for their (ii)_____. Yet writers, by contrast, are expected to (iii)_____ if they wish to be taken seriously.

Blank (i)

joyful
austere
esoteric

Blank (ii)

frivolousness
inaccessibility
pretentiousness

Blank (iii)

affirm idealism
eschew optimism
embrace realism

Select one entry from each column.

Questions 5 and 6 are based on this passage.

Researchers who study human foraging have found that while hunters and fishers choose the resource areas (patches) with the highest mean profitability most frequently, they do not exploit these patches exclusively. A possible explanation for this finding might be daily variation in environmental conditions, such as prey movements and weather conditions. If such daily fluctuations do not equally impact the profitability of patches across a habitat, the most profitable patch on average may not be the most profitable patch every day. A study of Ifaluk fishers revealed that they pursue alternative lower-ranked patches when the returns on that morning or the previous day from the highest-ranked patch are lower than those typically available from alternative patches.

The passage suggests which of the following about the patch choices made by human foragers?

- ☐ Foragers are influenced in their patch choices by short-term variations in patch potential.
- ☐ Foragers' patch choices reveal a concern for the long-range sustainability of available patches.
- ☐ Foragers are sometimes mistaken in their judgment as to which patches are typically most profitable.
- ☐ Foragers pay more attention to prey movement than to weather conditions in making patch choices.
- ☐ The relative profitability of various patches is not always the most important criterion in foragers' patch choices.

Select one answer choice.

Questions 5 and 6 are based on this passage.

Researchers who study human foraging have found that while hunters and fishers choose the resource areas (patches) with the highest mean profitability most frequently, they do not exploit these patches exclusively. A possible explanation for this finding might be daily variation in environmental conditions, such as prey movements and weather conditions. If such daily fluctuations do not equally impact the profitability of patches across a habitat, the most profitable patch on average may not be the most profitable patch every day. A study of Ifaluk fishers revealed that they pursue alternative lower-ranked patches when the returns on that morning or the previous day from the highest-ranked patch are lower than those typically available from alternative patches.

According to the passage, the “explanation” depends on which of the following being true?

- ☐ Daily variations in prey movement reflect changes in weather conditions.
- ☐ Daily variations in the profitability of any given patch are not too extreme.
- ☐ Changing environmental conditions have differential impacts on patches within a habitat.
- ☐ Prey movements and weather conditions are the primary determinants of patch profitability over the long term.
- ☐ Environmental conditions remain relatively constant over the long term.

Select one answer choice.

Questions 7 to 9 are based on this passage.

Eighteenth-century women played a significant part in British political life. Up and down the social scale they performed a variety of political acts, everything from purchasing political artifacts such as plates, handkerchiefs, and fans to penning political pamphlets, starring in civic processions, sponsoring boycotts, arguing over public issues in their own debating societies, rioting, and uttering seditious words. Whereas historians used to see female political involvement in this century as isolated or aberrant, they now stress the continuity and normalcy of such activity, especially for aristocratic women. Given the familial nature of aristocratic politics, noble women were actually expected to act as political advisors and agents for their husbands, to canvass in elections, to serve as political hostesses, to seek and dispense political patronage. They did so routinely long before the eighteenth and deep into the nineteenth century. Patrician women had such far-reaching political influence, it has been argued recently, that they actually stood to lose by expansion of the electorate to include women. Fruitful as this new historiography has been, however, it has also been criticized for its focus on the machinations of high politics and its inattention to ideology. Given the widespread hostility to “public” women in the eighteenth century, was female political activity quite so unproblematic as these new studies tend to assume? Anna Clark has pointed out that celebration of elite politicking neglects both the condition of ordinary

The author suggests which of the following about the “expansion of the electorate to include women” in eighteenth-century Britain?

- ☐ It might have reduced women’s incentive to engage in such political activities as boycotts and riots.
- ☐ It might have reduced the political power of some people who had exerted great influence.
- ☐ It would have been unlikely to overturn the aristocracy’s political control of the country.
- ☐ It would likely have extended the vote only to aristocratic women.
- ☐ It was not an issue addressed by men who were engaged in politics.

Select one answer choice.

Questions 7 to 9 are based on this passage.

purchasing political artifacts such as plates, handkerchiefs, and fans to penning political pamphlets, starring in civic processions, sponsoring boycotts, arguing over public issues in their own debating societies, rioting, and uttering seditious words. Whereas historians used to see female political involvement in this century as isolated or aberrant, they now stress the continuity and normalcy of such activity, especially for aristocratic women. Given the familial nature of aristocratic politics, noble women were actually expected to act as political advisors and agents for their husbands, to canvass in elections, to serve as political hostesses, to seek and dispense political patronage. They did so routinely long before the eighteenth and deep into the nineteenth century. Patrician women had such far-reaching political influence, it has been argued recently, that they actually stood to lose by expansion of the electorate to include women. Fruitful as this new historiography has been, however, it has also been criticized for its focus on the machinations of high politics and its inattention to ideology. Given the widespread hostility to "public" women in the eighteenth century, was female political activity quite so unproblematic as these new studies tend to assume? Anna Clark has pointed out that celebration of elite politicking neglects both the condition of ordinary women and the devastating contemporary attacks on just this sort of upper-class influence peddling.

The author suggests which of the following about the "expansion of the electorate to include women" in eighteenth-century Britain?

- ☐ It might have reduced women's incentive to engage in such political activities as boycotts and riots.
- ☐ It might have reduced the political power of some people who had exerted great influence.

Questions 7 to 9 are based on this passage.

Eighteenth-century women played a significant part in British political life. Up and down the social scale they performed a variety of political acts, everything from purchasing political artifacts such as plates, handkerchiefs, and fans to penning political pamphlets, starring in civic processions, sponsoring boycotts, arguing over public issues in their own debating societies, rioting, and uttering seditious words. Whereas historians used to see female political involvement in this century as isolated or aberrant, they now stress the continuity and normalcy of such activity, especially for aristocratic women. Given the familial nature of aristocratic politics, noble women were actually expected to act as political advisors and agents for their husbands, to canvass in elections, to serve as political hostesses, to seek and dispense political patronage. They did so routinely long before the eighteenth and deep into the nineteenth century. Patrician women had such far-reaching political influence, it has been argued recently, that they actually stood to lose by expansion of the electorate to include women. Fruitful as this new historiography has been, however, it has also been criticized for its focus on the machinations of high politics and its inattention to ideology. Given the widespread hostility to “public” women in the eighteenth century, was female political activity quite so unproblematic as these new studies tend to assume? Anna Clark has pointed out that celebration of elite politicking neglects both the condition of ordinary

According to the passage, the approach taken by contemporary historians to the issue of the political role of eighteenth-century women differs from that taken by earlier historians in that contemporary historians

- ☐ see women’s involvement in eighteenth-century politics as commonplace
- ☐ argue that eighteenth-century women had considerable political autonomy
- ☐ note the singular political achievements of a few aristocratic women in the eighteenth century
- ☐ view the political situation of eighteenth-century women as significantly different from that of nineteenth-century women
- ☐ stress the political opportunities that were available for nonaristocratic eighteenth-century women

Select one answer choice.

Questions 7 to 9 are based on this passage.

purchasing political artifacts such as plates, handkerchiefs, and fans to penning political pamphlets, starring in civic processions, sponsoring boycotts, arguing over public issues in their own debating societies, rioting, and uttering seditious words. Whereas historians used to see female political involvement in this century as isolated or aberrant, they now stress the continuity and normalcy of such activity, especially for aristocratic women. Given the familial nature of aristocratic politics, noble women were actually expected to act as political advisors and agents for their husbands, to canvass in elections, to serve as political hostesses, to seek and dispense political patronage. They did so routinely long before the eighteenth and deep into the nineteenth century. Patrician women had such far-reaching political influence, it has been argued recently, that they actually stood to lose by expansion of the electorate to include women. Fruitful as this new historiography has been, however, it has also been criticized for its focus on the machinations of high politics and its inattention to ideology. - ☐ tension
- ☐ misconception
- ☐ discord
- ☐ delusion
- ☐ controversy

Select two answer choices.

Question 13 is based on this passage.

A law has been proposed requiring the cargo boxes of trucks carrying gravel to be covered by a tarpaulin, because vehicles driving close behind open-topped gravel trucks can be damaged by gravel flying off these trucks. The law is unlikely to substantially reduce such damage, however: flying gravel is much less likely to come from the cargo box itself than from the grooves of the tires, in which gravel can become wedged during loading.

Which of the following, if true, provides the strongest support for the argument given?

- ☐ The drivers of vehicles behind a gravel truck are more likely to remain close behind the truck if the truck's cargo box is covered than if it is uncovered.
- ☐ Most trucks that carry gravel already carry tarpaulins that their drivers use to cover the cargo box when they are carrying sand, which can blow out of the cargo box in significant quantities.
- ☐ Of all the damage that occurs to vehicles on the highway, debris that flies off trucks is the cause of only a very small fraction.
- ☐ The proposed law allows open-topped trucks on the highway to have uncovered cargo boxes whenever their cargo boxes are empty.
- ☐ Because of the great weight of a load of gravel, the driver of a gravel truck is often driving much more slowly than most of the other vehicles on the road.

Select one answer choice.

Questions 14 and 15 are based on this passage.

Female Australian *Dunatothrips* [small, sap-sucking insects] create tent-like structures on the surface of leaves to protect themselves and their eggs and larvae from desiccation in the arid Australian climate. Bono and Crespi compared survival and reproduction of thrips that founded structures alone with those in groups of two or more individuals. They found that although per capita egg production fell with increasing group size, foundresses were more likely to survive and lay eggs in groups than when alone. Several studies of other species of nest-building insects have concluded that foundress associations are beneficial to all parties. It is likely that the relative success of groups is at least in part accounted for by a reduction of energy use in the modification of a shared nest.

The author would most likely agree with which of the following claims about Australian *Dunatothrips*?

- ☐ Their offspring survival rates increase when larger groups cooperate to modify nests.
- ☐ Their effect on the leaves used to support their tent-like structures is not necessarily permanent.
- ☐ They expend as much energy to create tent-like structures as they do to produce broods.
- ☐ They exhibit an effect from collective activity that is also found in certain other insect species.
- ☐ They modify nests in different ways depending on what other species are present in their vicinity.

Select one answer choice.

Questions 14 and 15 are based on this passage.

Female Australian *Dunatothrips* [small, sap-sucking insects] create tent-like structures on the surface of leaves to protect themselves and their eggs and larvae from desiccation in the arid Australian climate. Bono and Crespi compared survival and reproduction of thrips that founded structures alone with those in groups of two or more individuals. They found that although per capita egg production fell with increasing group size, foundresses were more likely to survive and lay eggs in groups than when alone. Several studies of other species of nest-building insects have concluded that foundress associations are beneficial to all parties. It is likely that the relative success of groups is at least in part accounted for by a reduction of energy use in the modification of a shared nest.

- The author mentions “desiccation” primarily to
- ☐ describe an environment suitable for one species’ reproduction
 - ☐ characterize a stage in an insect species’ developmental cycle
 - ☐ analyze an environmental challenge faced by some insect species
 - ☐ exemplify a changing feature of a particular climate
 - ☐ identify the purpose served by a particular behavior

$$S: 2, 4, 7, 3, 5, 2, 4, 7, 3, 5, \dots$$

S is a sequence of 100 integers consisting of the sequence 2, 4, 7, 3, 5 repeated 20 times.

Quantity A

The 90th integer in S

Quantity B

The 97th integer in S

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

$$0 < x < y$$
$$Rx + y < 0$$

Quantity A

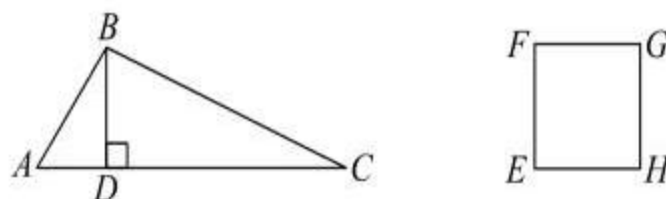

$$x - y$$

Quantity B

$$R$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

The area of triangular region ABC is equal to the area of square region $EFGH$. The length of AC is equal to 4 times the length of EH .

Quantity A

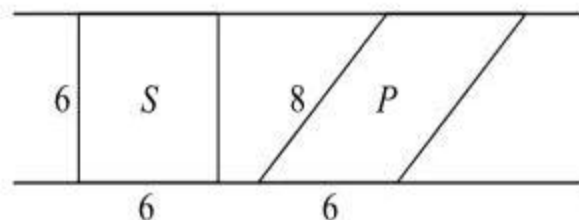

The length of BD

Quantity B

The length of EH

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

The regions enclosed by the square and the parallelogram have areas S and P , respectively.

Quantity A

S

Quantity B

P

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Three people are in the process of reviewing 50 grant proposals. The numbers of proposals that each has reviewed so far are 32, 28, and 25, respectively.

Quantity A

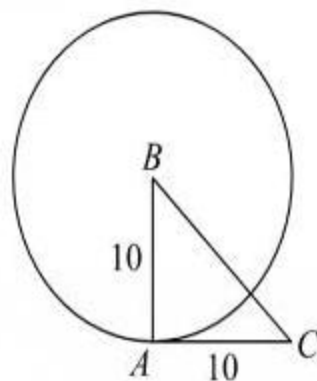

The number of proposals that have been reviewed by at least 2 reviewers

Quantity B

32

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

In the figure shown, B is the center of the circle, line segments AB and AC both have length 10, and line segment AC is tangent to the circle at point A . Approximately what is the area of the intersection of the circle and the triangle?

- ☐ 8
- ☐ 40
- ☐ 45
- ☐ 50
- ☐ 80

Select one answer choice.

In a certain election, $\frac{3}{5}$ of the voters in District K and $\frac{1}{2}$ of the voters in District P voted for the candidate Miguel García. If 4 times as many people voted in District K as voted in District P , what percent of the voters in both districts combined voted for Miguel García?

☐ 52%

☐ 54%

☐ 55%

☐ 56%

☐ 58%

Select one answer choice.

Stations A , M , and B are located along a certain train route, and Station M is between Stations A and B . At noon, a train engine passed Station A traveling at a constant speed of 80 kilometers per hour toward Station B . Also at noon, another train engine passed Station B traveling at a constant speed of 60 kilometers per hour toward Station A . Both train engines passed Station M at the same time. What is the ratio of the distance along the route between Stations A and M to the distance along the route between Stations A and B ?

☐ $\frac{1}{4}$

☐ $\frac{3}{7}$

☐ $\frac{1}{2}$

☐ $\frac{4}{7}$

☐ $\frac{3}{4}$

Select one answer choice.

If $x + v = 11w$, which of the following represents the average (arithmetic mean) of x , v , and w , in terms of w ?

- ☐ w ☐ $4w$ ☐ $6w$ ☐ $\frac{w}{3}$ ☐ $\frac{2w}{3}$

Select one answer choice.

The function f is defined by $f(x) = \sqrt{x} - 2$ for all numbers $x \geq 0$. If $f(f(v)) = 0$ and $v \geq 4$, what is the value of v ?

- ☐ 8 ☐ $8\sqrt{2}$ ☐ 16 ☐ $16\sqrt{2}$ ☒ 36

Select one answer choice.

Each day for 25 days, the number of people who used a certain library that day was recorded. The standard deviation of the 25 recorded numbers is 12.

Which of the following statements individually provide(s) sufficient additional information to determine the mean of the 25 recorded numbers?

Indicate all such statements.

- ☐ The median of the recorded numbers is 49.
- ☐ One of the recorded numbers, 45, is $\frac{1}{3}$ standard deviation below the mean.
- ☐ More than 50 percent of the recorded numbers are between 37 and 61.

Select one or more answer choices.

If k and n are each positive integers between 12 and 30, then $\frac{5+k}{7+n}$ will be equal to $\frac{5}{7}$ for how many pairs (k, n) ?

- ☐ Two
- ☐ Three
- ☐ Four
- ☐ Seventeen
- ☐ Nineteen

Select one answer choice.

For one toss of a certain coin, the probability that the outcome will be heads is $\frac{1}{2}$.

If this coin is tossed 4 times, what is the probability that the outcome will be heads at least 3 times?

☐ $\left(\frac{1}{2}\right)^2$

☐ $\left(\frac{1}{2}\right)^3$

☐ $(5)\left(\frac{1}{2}\right)^4$

☐ $(6)\left(\frac{1}{2}\right)^4$

☐ $(11)\left(\frac{1}{2}\right)^4$

Select one answer choice.

In the xy -plane, line n has x -intercept h and y -intercept t , where h and t are positive numbers. Which of the following points must lie on line n ?

Indicate all such points.

☐ $(h, 0)$

☐ $(0, h)$

☐ $(t, 0)$

☐ $(0, t)$

☐ (h, t)

☐ $\left(\frac{h}{2}, \frac{t}{2}\right)$

A bag contains 8 pounds of nuts, and $\frac{1}{3}$ of the nuts, by weight, are walnuts. If 3 pounds of walnuts are added to the bag, what will be the fraction of the nuts in the bag, by weight, that are walnuts?

Enter your answer as a fraction, with the numerator and denominator in their respective answer boxes. Backspace to erase.
