

m and n are integers.

$$(135)(75) = (3^m)(5^n)$$

Quantity A

m

Quantity B

n

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

The length of an arc of a certain circle is 2π , which is equal to $\frac{1}{6}$ of the circumference of the circle.

Quantity A

The radius of the circle

Quantity B

6

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

$$x = (a + bt)^2 - (a - bt)^2$$

a , b , and t are positive numbers.

Quantity A

$$\frac{x}{ab}$$

Quantity B

$$t$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

A certain club has 140 members. The January meeting of the club was attended by 80 percent of the members, and the February meeting was attended by 124 members.

Quantity A

The number of members of the club
who attended both meetings

Quantity B

104

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Evan, Irene, and Juanita collected glass bottles for recycling. Evan collected twice as many bottles as Irene, and Juanita collected more bottles than the total number of bottles collected by Evan and Irene. If Juanita collected 60 bottles, which of the following could be the number of bottles Evan collected?

Indicate all such numbers.

- ☐ 12
- ☐ 22
- ☐ 32
- ☐ 42
- ☐ 52

Select one or more answer choices.

Questions 6 to 8 are based on the following data.

**Amount Spent on Advertising in
the United States for Ten
Selected Categories, 2002 and 2003**

Category	Amount Spent (millions of dollars)	
	2002	2003
Domestic cars and trucks	\$ 7,144	\$ 7,551
Nondomestic cars and trucks	7,063	7,709
Transportation and tourism	4,483	4,492
Telecommunication services	4,288	4,924
Media and marketing services	4,172	4,465
Banking and investment services	4,041	4,338
Restaurants	3,900	3,988
Packaged foods	3,504	3,587
Motion pictures	3,417	3,744
Pharmaceuticals	2,829	3,425
Total (for all ten categories)	\$44,841	\$48,223

In 2003 the total amount spent on advertising for restaurants and advertising for motion pictures was what percent of the total amount spent on advertising for all ten categories?

Give your answer to the nearest whole percent.

%

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

Questions 6 to 8 are based on the following data.

**Amount Spent on Advertising in
the United States for Ten
Selected Categories, 2002 and 2003**

Category	Amount Spent (millions of dollars)	
	2002	2003
Domestic cars and trucks	\$ 7,144	\$ 7,551
Nondomestic cars and trucks	7,063	7,709
Transportation and tourism	4,483	4,492
Telecommunication services	4,288	4,924
Media and marketing services	4,172	4,465
Banking and investment services	4,041	4,338
Restaurants	3,900	3,988
Packaged foods	3,504	3,587
Motion pictures	3,417	3,744
Pharmaceuticals	2,829	3,425
Total (for all ten categories)	\$44,841	\$48,223

Which of the following is closest to the percent increase from 2002 to 2003 in the amount spent on advertising for media and marketing services?

- ☐ 5.4%
- ☐ 5.8%
- ☐ 6.3%
- ☐ 6.6%
- ☐ 7.0%

Select one answer choice.

Questions 6 to 8 are based on the following data.

**Amount Spent on Advertising in
the United States for Ten
Selected Categories, 2002 and 2003**

Category	Amount Spent (millions of dollars)	
	2002	2003
Domestic cars and trucks	\$ 7,144	\$ 7,551
Nondomestic cars and trucks	7,063	7,709

Banking and investment services	4,041	4,338
Restaurants	3,900	3,988
Packaged foods	3,504	3,587
Motion pictures	3,417	3,744
Pharmaceuticals	2,829	3,425
Total (for all ten categories)	\$44,841	\$48,223

For 2002, which of the following is closest to the ratio of the amount spent on advertising for domestic cars and trucks to the amount spent on advertising for pharmaceuticals?

- ☐ 4 to 1
- ☐ 7 to 2
- ☐ 3 to 1
- ☐ 5 to 2
- ☐ 2 to 1

Select one answer choice.

If $\frac{y}{x-2} = 1$, which of the following must be true?

☐ $x \neq 2$ and $y \neq 0$

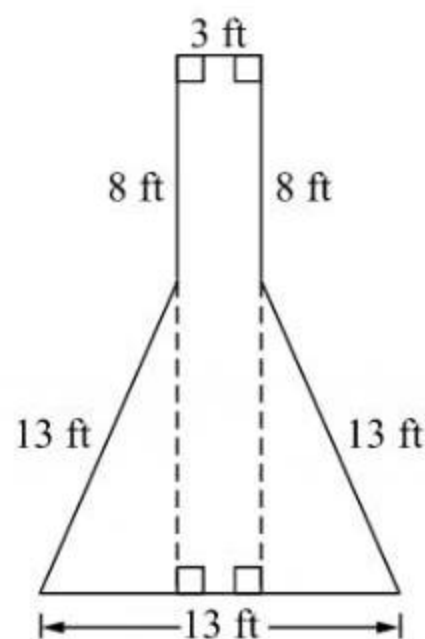

☐ $x \neq 2$ and $y = 0$

☐ $x = 2$ and $y \neq 0$

☐ $x = 2$ and $y = 0$

☐ $x = 3$ and $y = 1$

Select one answer choice.

A homeowner wants to pour concrete for a new patio and walkway according to the layout shown above. If the concrete is to be $\frac{1}{3}$ foot thick, how many cubic feet of concrete will be needed to form the patio and walkway?

- ☐ 60 ☐ 50 ☐ 40 ☐ 30 ☐ 20

Select one answer choice.

If $x > 0$, which of the following is equal to 1.25 percent of x ?

- ☐ $\frac{1}{80}x$ ☐ $\frac{1}{8}x$ ☐ $\frac{1}{4}x$ ☐ $\frac{5}{8}x$ ☐ $\frac{5}{4}x$

Select one answer choice.

Points B , C , and D lie on line segment AE such that D is the midpoint of AE , B is the midpoint of line segment AD , and C is the midpoint of line segment BD . If the length of CE is 22.5, what is the length of AC ?

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

Select one entry for the blank. Fill the blank in the way that best completes the text.

Satellite data show that earthquakes are sometimes _____ by local anomalous changes in the ionosphere over their epicenters, suggesting a way of improving earthquake forecasts.

exacerbated
portended
accompanied
succeeded
averted

Select one answer choice.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

The garments created by Tunisian fashion designer Salah Barka, though not understated in style, are (i)_____ in their references to local cultures and histories: Barka evokes Africa without (ii)_____ readily discernible indigenous stylistic elements.

Blank (i)

subtle
commanding
inconsistent

Blank (ii)

direct reproduction of
obvious departure from
imaginative adaptations of

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

The lack of (i)_____ the poetry of the postwar decades has led not, as one might have expected, to (ii)_____ poetry, but to a curious closure in which all poets and forms of poetry are (iii)_____ and none, not even respected establishment poets, command excitement.

Blank (i)

interest in
consensus about
innovation in

Blank (ii)

pluralistic debate on
popular acceptance of
any experimentation in

Blank (iii)

marginalized
revered
tolerated

Select one entry from each column.

Questions 4 and 5 are based on this passage.

The source of vitamin C in the traditional Inuit diet was long a mystery. Most animals can synthesize vitamin C in their livers, but humans are among the exceptions. If humans do not ingest enough vitamin C, the result is scurvy, a potentially fatal connective-tissue disease. Most Americans today get ample supplies from orange juice, citrus fruits, and fresh vegetables. But getting enough vitamin C from a ship's provisions was especially tricky for explorers voyaging to the Inuit's native polar regions, and scurvy plagued European and United States expeditions there even in the twentieth century. However, Arctic peoples were free of the disease, even in the long winter, when they subsisted entirely on meat and fish they caught, often eaten raw.

Consider each of the choices separately and select all that apply.

The passage suggests which of the following about humans' need for vitamin C?

- ☐ Humans can rely on vitamin C stored in the body for as long as a year.
- ☐ Humans need vitamin C to maintain the health of connective tissue in the body.
- ☐ The only way to meet the need for vitamin C is to consume fruit, fruit juices, and vegetables.

Select one or more answer choices.

Questions 4 and 5 are based on this passage.

The source of vitamin C in the traditional Inuit diet was long a mystery. Most animals can synthesize vitamin C in their livers, but humans are among the exceptions. If humans do not ingest enough vitamin C, the result is scurvy, a potentially fatal connective-tissue disease. Most Americans today get ample supplies from orange juice, citrus fruits, and fresh vegetables. But getting enough vitamin C from a ship's provisions was especially tricky for explorers voyaging to the Inuit's native polar regions, and scurvy plagued European and United States expeditions there even in the twentieth century. However, Arctic peoples were free of the disease, even in the long winter, when they subsisted entirely on meat and fish they caught, often eaten raw.

Which of the following, if true, most helps to resolve the mystery of the source of vitamin C in the traditional Inuit diet?

- ☐ American and European Arctic explorers who adopted an Inuit diet did not develop scurvy.
- ☐ American and European expeditions generally relied on salted or canned meat and dried provisions, none of which provide vitamin C.
- ☐ With the progressive abandonment of their traditional diet, the Inuit have become more susceptible to scurvy.
- ☐ Vitamin C is present in meat and the connective tissue of animals but is destroyed by extended cooking.
- ☐ The fact that fresh fruit and vegetables can ward off scurvy was recognized more than 150 years before vitamin C was identified.

Select one answer choice.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Evolutionary psychologists hold that mating patterns arise from individual strategies to _____ one' s genetic qualities, either by producing more offspring or by aiding the survival of one' s relatives.

- ☐ ascertain
- ☐ transcend
- ☐ transmit
- ☐ propagate
- ☐ overcome
- ☐ regulate

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Nancy Weiss Malkiel's painstakingly detailed history of coeducation at elite universities is an invaluable _____ the amnesia that has come to envelop even such a relatively recent—but critically neglected—development.

- ☐ antidote to
- ☐ summary of
- ☐ reinterpretation of
- ☐ corrective to
- ☐ diagnosis of
- ☐ addition to

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Typefaces, in one sense, are just like styles of shoes: they _____ because different people have different tastes and identities and because both creators and users value novelty for its own sake.

- ☐ bemuse
- ☐ converge
- ☐ proliferate
- ☐ abound
- ☐ evolve
- ☐ coincide

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

The impact of the film on people' s perceptions of what happened illustrates the power of fiction to _____ history: patently inaccurate, the story told by the film has nevertheless come to be the standard account.

- ☐ trump
- ☐ distort
- ☐ exploit
- ☐ supplant
- ☐ popularize
- ☐ utilize

Select two answer choices.

Questions 10 to 12 are based on this passage.

The expectation that science is a stable body of relatively objective knowledge on which the law can draw to settle legal controversies may seem benign. However, this expectation often corresponds to a romantic notion of the scientific enterprise and thereby eclipses not only the instabilities and controversies within science itself, but also the social and rhetorical aspects of even the best science. We see the idealization of science in law whenever there is a presumption that if two scientific experts disagree, one of them must be a "junk scientist." This presumption ignores the theoretical presuppositions and limitations of data that lead to genuine scientific disputes. We also see the idealization of science in law whenever we associate "bias, interest, and motivation" with unreliable expertise. This association misses the practical advances made by scientists who have strong theoretical biases, institutional interests, and financial motivations. Finally, we see the idealization of science in law whenever a legislator, administrator, or judge demands certainty from science, not recognizing its probabilistic nature and dynamic history. It is neither a critique of scientific progress nor an exaggeration to acknowledge scientific debates, the conventional aspects of scientific methodology, the importance of networking and "social capital" with respect to publications and grants, and the persuasive elements in scientific discourse. To think that these features are somehow markers of bad science is to idealize science.

The primary purpose of the passage is to

- ☐ explain why a particular view of science is problematic
- ☐ account for the prevalence of a particular view of science
- ☐ present a debate about the nature of scientific knowledge
- ☐ suggest that scientific evidence cannot resolve legal disputes
- ☐ examine flaws in a particular approach to resolving scientific disputes

Select one answer choice.

Questions 10 to 12 are based on this passage.

The expectation that science is a stable body of relatively objective knowledge on which the law can draw to settle legal controversies may seem benign. However, this expectation often corresponds to a romantic notion of the scientific enterprise and thereby eclipses not only the instabilities and controversies within science itself, but also the social and rhetorical aspects of even the best science. We see the idealization of science in law whenever there is a presumption that if two scientific experts disagree, one of them must be a "junk scientist." This presumption ignores the theoretical presuppositions and limitations of data that lead to genuine scientific disputes. We also see the idealization of science in law whenever we associate "bias, interest, and motivation" with unreliable expertise. This association misses the practical advances made by scientists who have strong theoretical biases, institutional interests, and financial motivations. Finally, we see the idealization of science in law whenever a legislator, administrator, or judge demands certainty from science, not recognizing its probabilistic nature and dynamic history. It is neither a critique of scientific progress nor an exaggeration to acknowledge scientific debates, the conventional aspects of scientific methodology, the importance of networking and "social capital" with respect to publications and grants, and the persuasive elements in scientific discourse. To think that these features are somehow markers of bad science is to idealize science.

The author suggests that which of the following can lead to the dismissal of a scientific expert as a junk scientist?

- ☐ An expert misrepresents the conclusiveness of the data presented in support of a particular claim.
- ☐ An expert is asked to testify in a dispute that most nonscientists find overly technical.
- ☐ An expert is asked to testify in a dispute involving questions that arguably lie outside the realm of scientific knowledge.
- ☐ There is a general belief that sound science resolves contradictions in favor of a single valid conclusion.
- ☐ There is a general view that most scientists often manipulate evidence to achieve a desired outcome.

Select one answer choice.

Questions 10 to 12 are based on this passage.

The expectation that science is a stable body of relatively objective knowledge on which the law can draw to settle legal controversies may seem benign. However, this expectation often corresponds to a romantic notion of the scientific enterprise and thereby eclipses not only the instabilities and controversies within science itself, but also the social and rhetorical aspects of even the best science. We see the idealization of science in law whenever there is a presumption that if two scientific experts disagree, one of them must be a "junk scientist." This presumption ignores the theoretical presuppositions and limitations of data that lead to genuine scientific disputes. We also see the idealization of science in law whenever we associate "bias, interest, and motivation" with unreliable expertise. This association misses the practical advances made by scientists who have strong theoretical biases, institutional interests, and financial motivations. Finally, we see the idealization of science in law whenever a legislator, administrator, or judge demands certainty from science, not recognizing its probabilistic nature and dynamic history. It is neither a critique of scientific progress nor an exaggeration to acknowledge scientific debates, the conventional aspects of scientific methodology, the importance of networking and "social capital" with respect to publications and grants, and the persuasive elements in scientific discourse. To think that these features are somehow markers of bad science is to idealize science.

The author mentions "scientists who have strong theoretical biases, institutional interests, and financial motivations" primarily in order to

- ☐ explain why an idealistic view of science has value even if it sometimes leads to untenable assumptions
- ☐ point out that even well-intentioned scientists may underestimate factors that can skew their conclusions in a particular direction
- ☐ suggest that tendencies often assumed to contaminate scientists' work need not preclude valuable scientific achievements
- ☐ distinguish the kinds of researchers often dismissed as "junk scientists" from those whose work has produced valuable scientific advances
- ☐ underscore the point that scientific evidence can be used to support claims that cannot be reconciled with one another

Select one answer choice.

Number of Defective Lightbulbs	0	1	2	3 or more
Frequency	22	17	6	5

Fifty boxes of lightbulbs were examined during a quality-control check. The number of defective lightbulbs per box and the corresponding frequencies are summarized in the table.

Quantity A

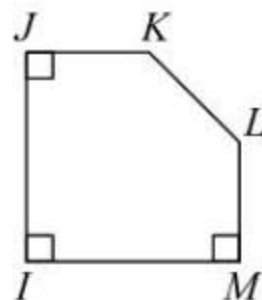

The median number of defective lightbulbs per box for the fifty boxes

Quantity B

1

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Quantity A

The measure of angle JKL

Quantity B

The measure of angle KLM

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

n is a positive integer.

Quantity A

The remainder when $n(n^2 - 1)$ is divided by 6

Quantity B

1

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Triangle PQR is inscribed in a circle, and side PR is a diameter of the circle.

Quantity A

The area of triangle PQR

Quantity B

$\frac{1}{3}$ of the area of the circle

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

x and y are integers and $x > y$.

$$x^2 + y^2 = 25$$

Quantity A

x

Quantity B

4

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

On January 1, 2000, a customer invested a total of \$5,000 in two new accounts. There were no other deposits to, or withdrawals from, the two accounts. During the one-year period ending on January 1, 2001, one account earned 5 percent interest and the other earned 8 percent interest. If, on January 1, 2001, there was a total of \$5,370 in the two accounts, how much of the original investment of \$5,000 was invested in the account that earned 8 percent interest?

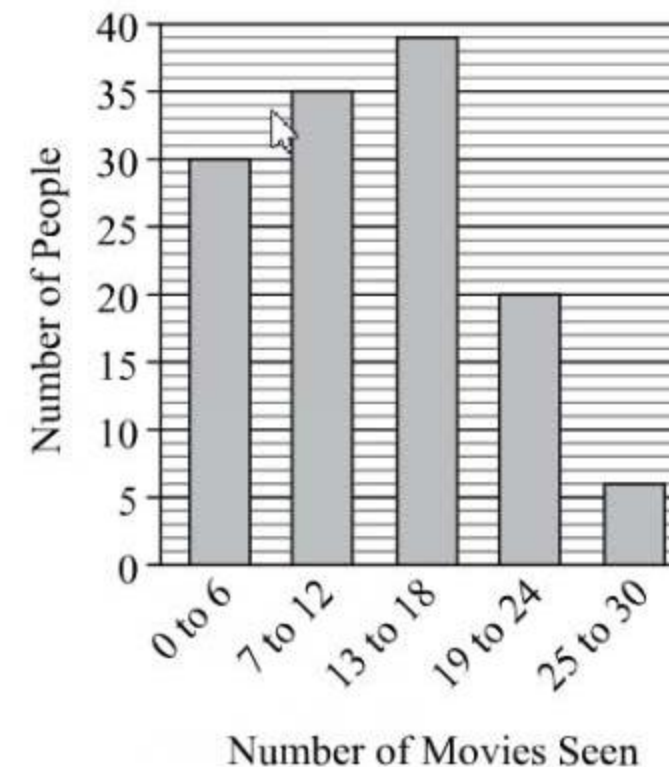

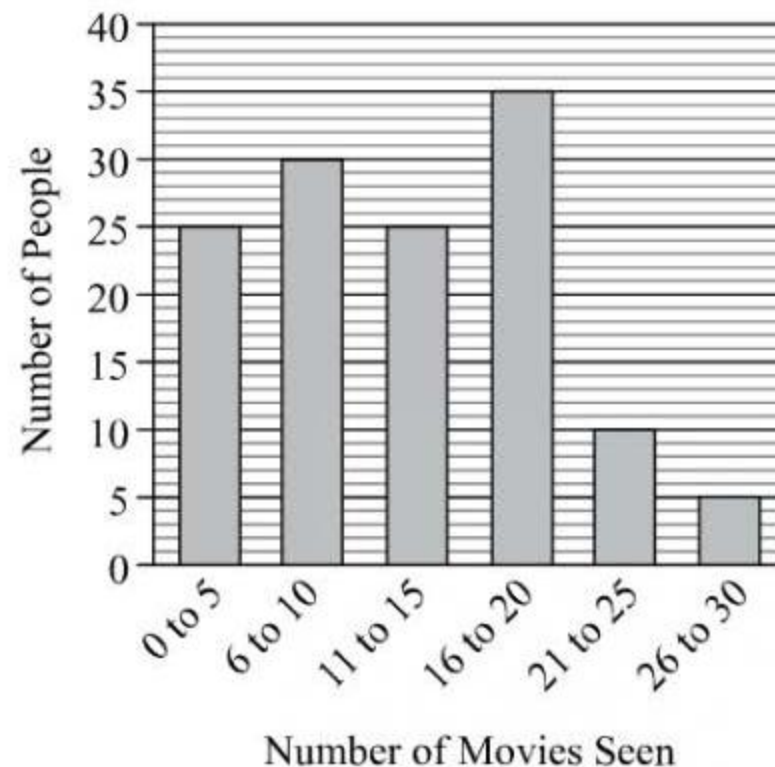

- ☐ \$1,500
- ☐ \$2,000
- ☐ \$2,500
- ☐ \$3,000
- ☐ \$4,000

Select one answer choice.

If a two-digit number that has x as the tens' digit and y as the units' digit is multiplied by 5, then the value of the product is

- ☐ $5xy$
- ☐ $5x + 5y$
- ☐ $5x + 50y$
- ☐ $50x + 5y$
- ☐ $50x + 50y$

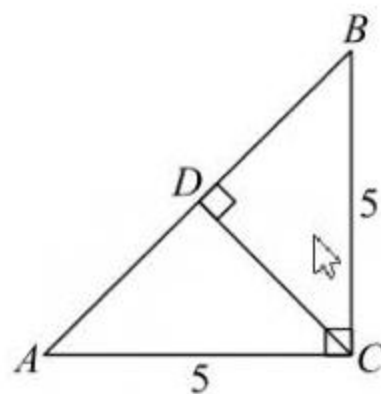

Select one answer choice.

In a survey, 130 people were asked how many movies they had seen in the preceding year. Their responses varied from 0 to 30 movies. The graphs above show two different summaries of the same survey results. How many people responded that they had seen 11 or 12 movies?

- ☐ 10 ☐ 12 ☐ 15 ☐ 20 ☐ 23

Select one answer choice.

In the figure above, what is the area of triangular region ADC ?

☐ $\frac{5\sqrt{2}}{2}$

☐ $5\sqrt{2}$

☐ $10\sqrt{2}$

☐ $\frac{25}{4}$

☐ $\frac{25}{2}$

Select one answer choice.

Of all the money collected in a certain charity drive, Cheryl collected 27 percent and Bart collected 18 percent. The amount of money collected by Cheryl was what percent greater than the amount collected by Bart?

- ☐ 9%
- ☐ $33\frac{1}{3}\%$
- ☐ 50%
- ☐ 100%
- ☐ 150%

Select one answer choice.

The unit price for tablecloths at a certain store is \$0.015 per square inch. At this rate, what is the total price at the store for a tablecloth with an area of 20 square feet? (1 foot = 12 inches)

\$

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

For two statistics classes, class A and class B , there are more students in class A than in class B . The heights of the students in both classes were measured.

Which of the following statements individually provide(s) sufficient additional information to conclude that the average (arithmetic mean) height of the students in class A is greater than the average height of the students in class B ?

Indicate all such statements.

- ☐ The average height of the students in class A is greater than the median height of the students in class B .
- ☐ The height of the tallest student in class B is less than the average height of the students in class A .
- ☐ The height of the shortest student in class A is greater than the median height of the students in class B .

Select one or more answer choices.

How many positive integers n satisfy the inequality $|10 - \sqrt{n}| < 1$?

- ☐ 38
- ☐ 39
- ☐ 40
- ☐ 41
- ☐ 42

Select one answer choice.

In the xy -plane, the point $(s, 2s - 4)$ lies on the line with equation $y = -\frac{5}{2}x + \frac{1}{3}$. What is the value of s ?

Give your answer as a fraction.

Enter your answer as a fraction, with the numerator and denominator in their respective answer boxes. Backspace to erase.

$$A = \{7, 8, 9, 10, 11\}$$

$$B = \{25, 26, 27, 28\}$$

If a number x is selected from set A and a number y is selected from set B , then $x + y$ can have how many different possible values?

- ☐ Eight
- ☐ Ten
- ☐ Twelve
- ☐ Fifteen
- ☐ Twenty

Select one answer choice.

Select one entry for the blank. Fill the blank in the way that best completes the text.

Baron' s book implores scientists to present their work in ways that are accessible to the general public in order to save the world at large from scientific illiteracy, _____ that is echoed in other recent publications.

a query
an analysis
an exhortation
an allurement
an implication

Select one answer choice.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Reviews written by music critic and composer Stephenson were hardly (i)_____: musicians who performed his music could count on sympathetic coverage, while those who ignored him were held to (ii)_____ standards.

Blank (i)

disinterested
lucid
conventional

Blank (ii)

exacting
minimal
accepted

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

She may have been (i)_____ when she was finance minister, fighting deficits, but now as prime minister she is marked by her (ii)_____.

Blank (i)

collaborative
austere
resourceful

Blank (ii)

discretion
largesse
platitudes

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Despite the apparently natural—if not essential—relationship between insult and (i)_____, for some people the experience of getting insulted may cause (ii)_____: instead of lashing out at the offender, they end up (iii)_____.

Blank (i)

self-esteem
injury
anger

Blank (ii)

outrage
dejection
confusion

Blank (iii)

reacting swiftly
suffering inwardly
recovering easily

Select one entry from each column.

Questions 5 and 6 are based on this passage.

The question of why the continental slope [the descent from the edge of the continental shelf to the ocean bottom] is not any steeper continues to perplex marine geologists. When only gravity acts on them, sediments piled underwater can easily maintain stable slopes of 15 degrees or more. Yet some 80 percent of all continental slopes dip downward at less than 8 degrees. Acting alone, the constant influx of sediments eroded from the land would, over time, steepen the grade, so, clearly, one or more natural forces are ensuring that these slopes remain low. Some scientists believe that a primary factor is internal tides: submerged waves, largely hidden from view, that pulse through the body of the ocean with the same twice-daily period as normal lunar tides.

The highlighted sentence serves primarily to

- ☐ identify a phenomenon that has proven difficult for scientists to verify
- ☐ provide information that explains why a phenomenon is puzzling
- ☐ acknowledge a flaw in the hypothesis presented in the passage
- ☐ illustrate with an example the problem posed earlier in the passage
- ☐ state a scientific fact that is questioned later in the passage

Select one answer choice.

Questions 5 and 6 are based on this passage.

The question of why the continental slope [the descent from the edge of the continental shelf to the ocean bottom] is not any steeper continues to perplex marine geologists. When only gravity acts on them, sediments piled underwater can easily maintain stable slopes of 15 degrees or more. Yet some 80 percent of all continental slopes dip downward at less than 8 degrees. Acting alone, the constant influx of sediments eroded from the land would, over time, steepen the grade, so, clearly, one or more natural forces are ensuring that these slopes remain low. Some scientists believe that a primary factor is internal tides: submerged waves, largely hidden from view, that pulse through the body of the ocean with the same twice-daily period as normal lunar tides.

The author of the passage mentions "one or more natural forces" primarily to

- ☒ explain why a certain phenomenon does not occur
- ☐ cite a factor that complicates a posed question
- ☐ provide evidence on which a theory is based
- ☐ suggest a direction for future research
- ☐ question the validity of a proposed hypothesis

Select one answer choice.

Questions 7 - 9 are based on this passage.

Nisei is a Japanese-language term for the children born to Japanese immigrants outside of Japan.

During the 1930s, Nisei authors in the United States published hundreds of stories and essays in English. This explosion of creative writing, almost unique among contemporary second-generation ethnic groups, developed partly in response to cultural influences absorbed from their Issei (immigrant) parents. As a result of policies of universal primary education in Meiji-era Japan, virtually all Japanese of both sexes were literate in their native language. From the dawn of Japanese settlement in the United States, the Issei continued to produce vernacular newspapers and magazines, and individuals—especially women—remained active in producing poetry as well as diaries and letters. Even if the largest part of Issei output was in Japanese and thus little read by the Nisei, who generally lacked Japanese reading skills (not to mention sufficient interest), the existence of a literate community among their parents nevertheless provided the young generation an immediate and clear model.

A related element of importance in the outpouring of literature was the existence of high-quality free public education in West Coast states such as California and Washington that had sizable Nisei populations. As part of their high school coursework, students took English and journalism classes and were thereby exposed to Western literature. High school and university newspapers and

The primary purpose of the passage is to

- ☐ consider the impact of educational policy on Japanese American life
- ☐ account for an unusual feature of Japanese American culture
- ☐ explore how Nisei writers reinterpreted Japanese literary conventions
- ☐ highlight women's contributions to Japanese American creative writing
- ☐ explain the effects of migration on Japanese-language literacy rates

Select one answer choice.

Questions 7 - 9 are based on this passage.

explosion of creative writing, almost unique among contemporary second-generation ethnic groups, developed partly in response to cultural influences absorbed from their Issei (immigrant) parents. As a result of policies of universal primary education in Meiji-era Japan, virtually all Japanese of both sexes were literate in their native language. From the dawn of Japanese settlement in the United States, the Issei continued to produce vernacular newspapers and magazines, and individuals—especially women—remained active in producing poetry as well as diaries and letters. Even if the largest part of Issei output was in Japanese and thus little read by the Nisei, who generally lacked Japanese reading skills (not to mention sufficient interest), the existence of a literate community among their parents nevertheless provided the young generation an immediate and clear model.

A related element of importance in the outpouring of literature was the existence of high-quality free public education in West Coast states such as California and Washington that had sizable Nisei populations. As part of their high school coursework, students took English and journalism classes and were thereby exposed to Western literature. High school and university newspapers and literary volumes in turn provided outlets for stories and poems by Nisei writers. Indeed, a significant fraction of the contributors to the prewar Nisei press (and of Nisei generally) were college-educated.

The primary purpose of the passage is to

- ☐ consider the impact of educational policy on Japanese American life
- ☐ account for an unusual feature of Japanese American culture
- ☐ explore how Nisei writers reinterpreted Japanese literary conventions
- ☐ highlight women's contributions to Japanese American creative writing
- ☐ explain the effects of migration on Japanese-language literacy rates

Select one answer choice.

From the dawn of Japanese settlement in the United States, the Issei continued to produce vernacular newspapers and magazines, and individuals—especially women—remained active in producing poetry as well as diaries and letters. Even if the largest part of Issei output was in Japanese and thus little read by the Nisei, who generally lacked Japanese reading skills (not to mention sufficient interest), the existence of a literate community among their parents nevertheless provided the young generation an immediate and clear model.

A related element of importance in the outpouring of literature was the existence of high-quality free public education in West Coast states such as California and Washington that had sizable Nisei populations. As part of their high school coursework, students took English and journalism classes and were thereby exposed to Western literature. High school and university newspapers and

In context, the highlighted sentence primarily serves to

- ☐ qualify an earlier assertion by specifying the population to which it applies
- ☐ amplify the significance of an argument by refining its implications
- ☐ reinforce a causal claim by providing additional evidence to support it
- ☐ clarify a potentially ambiguous statement by reiterating it in simpler terms
- ☐ conclude a complex argument by summarizing its overarching claim

Select one answer choice.

Questions 7 - 9 are based on this passage.

During the 1930s, Nisei authors in the United States published hundreds of stories and essays in English. This explosion of creative writing, almost unique among contemporary second-generation ethnic groups, developed partly in response to cultural influences absorbed from their Issei (immigrant) parents. As a result of policies of universal primary education in Meiji-era Japan, virtually all Japanese of both sexes were literate in their native language. From the dawn of Japanese settlement in the United States, the Issei continued to produce vernacular newspapers and magazines, and individuals—especially women—remained active in producing poetry as well as diaries and letters. Even if the largest part of Issei output was in Japanese and thus little read by the Nisei, who generally lacked Japanese reading skills (not to mention sufficient interest), the existence of a literate community among their parents nevertheless provided the young generation an immediate and clear model.

A related element of importance in the outpouring of literature was the existence of high-quality free public education in West Coast states such as California and Washington that had sizable Nisei populations. As part of their high school coursework, students took English and journalism classes and were thereby exposed to Western literature. High school and university newspapers and literary volumes in turn provided outlets for stories and poems by Nisei writers. Indeed, a significant fraction of the contributors to the prewar Nisei press (and of Nisei generally) were college-educated.

In context, the highlighted sentence primarily serves to

- ☐ qualify an earlier assertion by specifying the population to which it applies
- ☐ amplify the significance of an argument by refining its implications
- ☐ reinforce a causal claim by providing additional evidence to support it
- ☐ clarify a potentially ambiguous statement by reiterating it in simpler terms
- ☐ conclude a complex argument by summarizing its overarching claim

Questions 7 - 9 are based on this passage.

Nisei is a Japanese-language term for the children born to Japanese immigrants outside of Japan.

During the 1930s, Nisei authors in the United States published hundreds of stories and essays in English. This explosion of creative writing, almost unique among contemporary second-generation ethnic groups, developed partly in response to cultural influences absorbed from their Issei (immigrant) parents. As a result of policies of universal primary education in Meiji-era Japan, virtually all Japanese of both sexes were literate in their native language. From the dawn of Japanese settlement in the United States, the Issei continued to produce vernacular newspapers and magazines, and individuals—especially women—remained active in producing poetry as well as diaries and letters. Even if the largest part of Issei output was in Japanese and thus little read by the Nisei, who generally lacked Japanese reading skills (not to mention sufficient interest), the existence of a literate community among their parents nevertheless provided the young generation an immediate and clear model.

A related element of importance in the outpouring of literature was the existence of high-quality free public education in West Coast states such as California and Washington that had sizable Nisei populations. As part of their high school coursework, students took English and journalism classes and were thereby exposed to Western literature. High school and university newspapers and

The passage implies that by comparison with the Nisei, most “second-generation ethnic groups” in the United States during the 1930s

- ☐ were less populous in West Coast states such as California and Washington
- ☐ were less likely to have parents who were literate in any language
- ☐ were more likely to produce journalism
- ☐ had fewer opportunities to pursue higher education
- ☐ were more likely to participate in vibrant non-English literary communities

Select one answer choice.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Hoping to build a broader audience, the museum has mounted several exhibitions based on popular culture, but their impact on attendance has been negligible, and some complain that this direction has _____ the museum' s stature.

- ☐ protracted
- ☐ undermined
- ☐ burnished
- ☐ augmented
- ☐ diminished
- ☐ perpetuated

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

The attempt by some nineteenth-century physicists to reduce ordinary matter to electromagnetic fields was _____, but once it was one of the biggest hopes of theoretical physics.

- ☐ counterproductive
- ☐ unsuccessful
- ☐ ill-conceived
- ☐ ridiculed
- ☐ overambitious
- ☐ futile

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Cement' s virtues as a building material continue to be _____: it is versatile, inexpensive, pourable, and capable of becoming as hard as a rock.

- ☐ obvious
- ☐ debated
- ☐ diverse
- ☐ manifold
- ☐ exploited
- ☐ disputed

Select two answer choices.

Question 13 is based on this passage.

In the early 1900s, veneer for furniture was often made from elm burls, roughly hemispherical growths that occur on elm trees, and elm burls were imported to North America from Europe then. Since elm trees were plentiful in North America at that time, European elm burls must have been considered superior by the North American furniture makers who imported them.

Which of the following is an assumption on which the argument depends?

- ☐ No burls from North American elm trees were used for making veneer in North America in the early 1900s.
- ☐ North American furniture makers did not pay less for elm burls imported from Europe than for elm burls harvested in North America.
- ☐ Burls from other types of trees were not considered by American furniture makers to be superior to burls from elm trees.
- ☐ In the early 1900s, North Americans tended to prefer European goods even when equivalent goods made in North America were available.
- ☐ No wood from North American elm trees was ever exported from North America to Europe during the early 1900s.

Select one answer choice.

Questions 14 and 15 are based on this passage.

An Irish newspaper editorial encouraging women to participate in the nonimportation movement launched in Ireland in 1779 appears consistent with a perception that the political use of the consumer boycott originated in North America and spread eastwards across the Atlantic to Ireland. This is a view that most historians have concurred with. For example, T. H. Breen argued that the consumer boycott was a “brilliantly original American invention.” Breen did acknowledge that “a few isolated boycotts may have taken place in other countries.” However, Mary O’ Dowd argues that from the late seventeenth century, Irish political discourse advocated for the nonconsumption of imported goods and support for home manufactures by women in ways that were strikingly similar to those used later in North America.

The passage is primarily concerned with

- ☐ resolving a dispute
- ☐ advocating a course of action
- ☐ tracing the evolution of a practice
- ☐ citing competing views of an issue
- ☐ chronicling a series of events

Select one answer choice.

Questions 14 and 15 are based on this passage.

An Irish newspaper editorial encouraging women to participate in the nonimportation movement launched in Ireland in 1779 appears consistent with a perception that the political use of the consumer boycott originated in North America and spread eastwards across the Atlantic to Ireland. This is a view that most historians have concurred with. For example, T. H. Breen argued that the consumer boycott was a “brilliantly original American invention.” Breen did acknowledge that “a few isolated boycotts may have taken place in other countries.” However, Mary O’ Dowd argues that from the late seventeenth century, Irish political discourse advocated for the nonconsumption of imported goods and support for home manufactures by women in ways that were strikingly similar to those used later in North America.

In the context of the passage, the highlighted sentence serves to

- ☐ qualify a point made in the preceding sentence
- ☐ correct an erroneous assumption
- ☐ provide evidence in support of a perception cited in the opening sentence
- ☐ provide a rationale for the view expressed in the following sentence
- ☐ establish the popularity of a point of view
