

Select one entry for the blank. Fill the blank in the way that best completes the text.

The fact that all major planets have satellites was _____ before the space age; however, the numbers of known satellites for these planets have been greatly expanded by spacecraft observations.

unheralded
recognized
baffling
disputed
novel

Select one answer choice.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Rachel Carson is rightly credited with jump-starting the modern environmental movement in the mid-twentieth century, but her (i)_____ has been (ii)_____: other ecologically minded women writers preceded and followed her.

Blank (i)

feminism
popularity
singularity

Blank (ii)

forgotten
recognized
exaggerated

Select one entry from each column.

For each blank select one entry from the corresponding column of choices. Fill all blanks in the way that best completes the text.

Leo Tolstoy wrote many works of nonfiction and professed (i)_____ these explorations of ethics and religion compared with his novels and short stories. The fiction writer in him, however, was hard to (ii)_____. *Hadji Murád* is a short novel with the breadth and power of an epic, with vivid characterization and intense storytelling that sweep the reader away. While the reader senses the moral concerns of the tale' s creator, the novel is a far cry from the (iii)_____ of Tolstoy' s nonfiction.

Blank (i)

a preference for
an aversion to
an indifference toward

Blank (ii)

suppress
identify
incite

Blank (iii)

didacticism
fluidity
creativity

Select one entry from each column.

Questions 4 and 5 are based on this passage.

Even the most complex models used in fishery management are cartoons of reality. They reduce hundreds of links in food webs to a handful and inadequately represent processes operating over space. Many of their assumptions are as flawed today as those of the simplest models of the past. Fish stocks, for one, are still assumed to be populations of a species that are isolated from one another. Yet many populations mix at their edges and some even migrate through areas occupied by other populations. Furthermore, the more complex models suffer from a "crisis of complexity" — more is really less. Adding layers of detail, each carrying its own set of assumptions, produces instability. The model's behavior becomes erratic, and conclusions drawn from it can be downright misleading.

In the context of the passage, the highlighted portion serves to

- ☐ confirm a prediction
- ☐ demonstrate an oversimplification
- ☐ recommend a reformulation
- ☐ anticipate an objection
- ☐ question a finding

Select one answer choice.

Questions 4 and 5 are based on this passage.

Even the most complex models used in fishery management are cartoons of reality. They reduce hundreds of links in food webs to a handful and inadequately represent processes operating over space. Many of their assumptions are as flawed today as those of the simplest models of the past. Fish stocks, for one, are still assumed to be populations of a species that are isolated from one another. Yet many populations mix at their edges and some even migrate through areas occupied by other populations. Furthermore, the more complex models suffer from a "crisis of complexity" — more is really less. Adding layers of detail, each carrying its own set of assumptions, produces instability. The model's behavior becomes erratic, and conclusions drawn from it can be downright misleading.

Consider each of the choices separately and select all that apply.

Which of the following can be inferred from the passage about "models of the past" ?

- ☐ They depended on more assumptions than do most of today's models.
- ☐ They often behaved less predictably than do today's more complex models.
- ☐ At least some of the assumptions they made are still used in models today.

Select one or more answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Even though the amount of detail in the book seems _____ by most standards, some experts contend that much that is necessary has been omitted.

- ☐ spare
- ☐ extravagant
- ☐ lean
- ☐ excessive
- ☐ appropriate
- ☐ typical

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

Evolutionary psychologists hold that mating patterns arise from individual strategies to _____ one' s genetic qualities, either by producing more offspring or by aiding the survival of one' s relatives.

- ☐ ascertain
- ☐ transcend
- ☐ transmit
- ☐ propagate
- ☐ overcome
- ☐ regulate

Select two answer choices.

Select the two answer choices that, when used to complete the sentence, fit the meaning of the sentence as a whole and produce completed sentences that are alike in meaning.

The Holy People in Navajo sacred narratives do not act as moral _____: when they teach, it is as often by what they do wrong as by what they do right.

- ☐ agents
- ☐ arbiters
- ☐ defenders
- ☐ paragons
- ☐ ethicists
- ☐ exemplars

Select two answer choices.

The so-called "sensation novel," popular in mid-nineteenth-century Britain, was dismissed by some as _____ form of fiction, partly because these spine-tingling novels often appeared as serials in cheap, disposable periodicals.

- ☐ an engrossing
- ☐ an ephemeral
- ☐ a macabre
- ☐ a transitory
- ☐ a captivating
- ☐ a debased

Select two answer choices.

Questions 10 to 12 are based on this passage.

Spanish documents concerning the Southwestern United States show that after A.D. 1600, the Apache, Athapaskan-speaking Native Americans, inhabited Southwestern locations in sizable numbers. Traditional interpretations of the rapid spread of these Athapaskan speakers across this region during the seventeenth and eighteenth centuries assume that Apaches moved into largely unoccupied territory. However, existing data fail to confirm that the Apache were actually moving across this territory in the large numbers suggested by post-1600 Spanish documents. An explanation for this discrepancy may lie in sixteenth-century Spanish expeditionary narratives that, despite their uneven quality and tendency to exaggerate, generally suggest that much of the Southwest was inhabited by non-Athapaskan speaking, mobile hunter-gatherer Native American groups who had once been sedentary pueblo-dwellers. If Athapaskan speakers such as the Apache routinely assimilated indigenous hunter-gatherer populations, as they did during the seventeenth century in the La Junta region, then the large number of people that the post-1600 Spanish documents identified as Apache may actually include indigenous groups who were assimilated by the Apache.

The author of the passage would most likely agree with which of the following statements about the spread of the Athapaskan language across the Southwest in the seventeenth and eighteenth centuries?

- ☐ It occurred more rapidly than traditional interpretations have suggested.
- ☐ It was partly responsible for the transformation of indigenous Southwest groups from pueblo dwellers to mobile hunter-gathers.
- ☐ It occurred more slowly in the La Junta region during the seventeenth century than it did in other parts of the Southwest.
- ☐ It was due less to the amalgamation of various indigenous groups than to the superior size of the migrant Athapaskan-speaking population.
- ☐ It may have been accelerated by the Apache' s successful assimilation of non-Athapaskan-speaking groups in the Southwest.

Select one answer choice.

Questions 10 to 12 are based on this passage.

Spanish documents concerning the Southwestern United States show that after A.D. 1600, the Apache, Athapaskan-speaking Native Americans, inhabited Southwestern locations in sizable numbers. Traditional interpretations of the rapid spread of these Athapaskan speakers across this region during the seventeenth and eighteenth centuries assume that Apaches moved into largely unoccupied territory. However, existing data fail to confirm that the Apache were actually moving across this territory in the large numbers suggested by post-1600 Spanish documents. An explanation for this discrepancy may lie in sixteenth-century Spanish expeditionary narratives that, despite their uneven quality and tendency to exaggerate, generally suggest that much of the Southwest was inhabited by non-Athapaskan speaking, mobile hunter-gatherer Native American groups who had once been sedentary pueblo-dwellers. If Athapaskan speakers such as the Apache routinely assimilated indigenous hunter-gatherer populations, as they did during the seventeenth century in the La Junta region, then the large number of people that the post-1600 Spanish documents identified as Apache may actually include indigenous groups who were assimilated by the Apache.

The "discrepancy" refers to the

- ☐ divergence between the number of Apache moving into the Southwest in the sixteenth century and the number of Apache moving into the Southwest in the seventeenth century
- ☐ difference between Spanish documents and other kinds of data concerning the movement of the Apache across the Southwest
- ☐ existence of Apache groups who were not speakers of Athapaskan
- ☐ presence of an inconsistency among the various sixteenth-century Spanish expeditionary narratives
- ☐ contradictory evidence for the hypothesis that the Southwest was occupied by sedentary pueblo-dwellers in the sixteenth century

Select one answer choice.

Questions 10 to 12 are based on this passage.

Spanish documents concerning the Southwestern United States show that after A.D. 1600, the Apache, Athapaskan-speaking Native Americans, inhabited Southwestern locations in sizable numbers. Traditional interpretations of the rapid spread of these Athapaskan speakers across this region during the seventeenth and eighteenth centuries assume that Apaches moved into largely unoccupied territory. However, existing data fail to confirm that the Apache were actually moving across this territory in the large numbers suggested by post-1600 Spanish documents. An explanation for this discrepancy may lie in sixteenth-century Spanish expeditionary narratives that, despite their uneven quality and tendency to exaggerate, generally suggest that much of the Southwest was inhabited by non-Athapaskan speaking, mobile hunter-gatherer Native American groups who had once been sedentary pueblo-dwellers. If Athapaskan speakers such as the Apache routinely assimilated indigenous hunter-gatherer populations, as they did during the seventeenth century in the La Junta region, then the large number of people that the post-1600 Spanish documents identified as Apache may actually include indigenous groups who were assimilated by the Apache.

The author of the passage suggests which of the following about the "traditional interpretations" ?

- ☐ They do not take into account the information regarding Native American inhabitants of the Southwest that is contained in sixteenth-century Spanish expeditionary narratives.
- ☐ They correctly estimate the size of the Apache population that moved into the Southwest during the seventeenth and eighteenth centuries.
- ☐ They assume that Apache populations routinely assimilated indigenous hunter-gatherer populations in the Southwest during the seventeenth and eighteenth centuries.
- ☐ They incorrectly identify certain locations in the Southwest as having been occupied by Athapaskan-speaking Native Americans after A.D. 1600.
- ☐ They assume that the Athapaskan language spread in the Southwest by the same means that it spread in other regions of the Americas.

Select one answer choice.

Quantity A

The probability that an integer chosen at random from those between 2 and 10, inclusive, will be prime

Quantity B

The probability that an integer chosen at random from those between 2 and 20, inclusive, will be prime

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

The length of an arc of a certain circle is 2π , which is equal to $\frac{1}{6}$ of the circumference of the circle.

Quantity A

The radius of the circle

Quantity B

6

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

1 kilogram is approximately equal to 2.2 pounds.

$$x < y$$

Quantity A

The number of pounds equal to x kilograms

Quantity B

The number of kilograms equal to y pounds

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

City *D* increased from a minor population center to a medium population center by increasing its population 10 percent over the 5-year period from 1985 to 1990, and by increasing its population 20 percent over the 10-year period from 1985 to 1995.

Quantity A

The percent increase in the population of City *D* over the 5-year period from 1990 to 1995

Quantity B

10%

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

Evan, Irene, and Juanita collected glass bottles for recycling. Evan collected twice as many bottles as Irene, and Juanita collected more bottles than the total number of bottles collected by Evan and Irene. If Juanita collected 60 bottles, which of the following could be the number of bottles Evan collected?

Indicate all such numbers.

- ☐ 12
- ☐ 22
- ☐ 32
- ☐ 42
- ☐ 52

Select one or more answer choices.

Questions 6 to 8 are based on the following data.

Ticket Sales for Ten Films Shown in Theaters Last Week

Film	Number of Theaters Showing the Film Last Week	Ticket Sales Last Week (millions of dollars)	Ticket Sales Since Film's Release (millions of dollars)	Number of Weeks Since Film's Release
<i>A</i>	3,467	16.32	56.98	2
<i>B</i>	2,547	15.28	25.75	2
<i>C</i>	2,664	14.33	38.42	3
<i>D</i>	2,723	9.43	9.43	1
<i>E</i>	2,078	3.65	42.39	7
<i>F</i>	2,012	3.09	124.41	10
<i>G</i>	1,364	2.81	49.43	5

If the weekly ticket sales for Film *I* decreased each week during the 8 weeks since its release (where the 8th week was last week), which of the following could be the total ticket sales for Film *I* for the first 4 weeks after its release?

☐ \$19 million☐ \$26 million☐ \$30 million☐ \$42 million☐ \$59 million

Select one answer choice.

To get from his house to a certain destination, George traveled a distance 4 kilometers due north, then a distance of 5 kilometers due east, and finally a distance of 6 kilometers due north. Approximately what is the straight-line distance, in kilometers, from George's house to the destination?

- ☐ 6
- ☐ 9
- ☐ 11
- ☐ 13
- ☐ 15

Select one answer choice.

The figure shows rectangle $ABCD$ with length 9 and width 3. If $BE = 5$, what is the ratio of the area of triangle ABE to the area of rectangle $ABCD$?

Give your answer as a fraction.

Enter your answer as a fraction, with the numerator and denominator in their respective answer boxes. Backspace to erase.

If $p \neq 1$, which of the following must be negative?

- ☐ $\frac{p+2}{1-p}$
- ☐ $\frac{p+2}{p-1}$
- ☐ $\frac{p-2}{1-p}$
- ☐ $\frac{p-2}{p-1}$
- ☐ $\frac{p-1}{1-p}$

Select one answer choice.

Set P consists of all the integers from 1 to 100, inclusive. Which of the following sets contains the greatest number of integers?

- ☐ The integers of P that are multiples of 3
- ☐ The integers of P that are multiples of 4
- ☐ The integers of P that are multiples of 5
- ☐ The integers of P that are multiples of both 3 and 4
- ☐ The integers of P that are multiples of either 4 or 5

sycophantic
absentminded
protean

Blank (iii)

superficially
familiarly
charitably

Select one entry from each column.

Questions 5 and 6 are based on this passage.

Dartmoor and Bodmin Moor in southwest England are for many the typical granite landscape: open, treeless, grassy, with abundant rock outcrops including tors (rocky pinnacles) and extensive block and boulder fields. Blanket peats and poor, difficult-to-use soils add to the impression of little human interference. In fact, the granite uplands of southwest England have a long history of human impact, and their present-day landscape contains few natural ingredients other than tors and boulders. The shaping of this land began in Neolithic times, more than 5,000 years ago, but accelerated approximately 4,000 years ago, during the Bronze Age. Neolithic and Bronze Age stone monuments appear to be the main witnesses to human presence, but the land cover is the most impressive legacy of human impact.

It can be inferred that many people assume which of the following about the landscapes of Dartmoor and Bodmin Moor?

- ☐ Their land cover is a completely natural feature.
- ☐ They have been shaped by humans in various and subtle ways.
- ☐ Their history of human impact began less than 5,000 years ago.
- ☐ They have more rock outcrops than does the typical granite landscape.
- ☐ Their soils have been made difficult to use by human activity.

Select one answer choice.

Questions 5 and 6 are based on this passage.

Dartmoor and Bodmin Moor in southwest England are for many the typical granite landscape: open, treeless, grassy, with abundant rock outcrops including tors (rocky pinnacles) and extensive block and boulder fields. Blanket peats and poor, difficult-to-use soils add to the impression of little human interference. In fact, the granite uplands of southwest England have a long history of human impact, and their present-day landscape contains few natural ingredients other than tors and boulders. The shaping of this land began in Neolithic times, more than 5,000 years ago, but accelerated approximately 4,000 years ago, during the Bronze Age. Neolithic and Bronze Age stone monuments appear to be the main witnesses to human presence, but the land cover is the most impressive legacy of human impact.

Consider each of the choices separately and select all that apply.

According to the passage, which of the following factors have contributed to the impression that humans have had little impact on Dartmoor and Bodmin Moor?

- ☐ Soils that are of poor quality
- ☐ Blanket peats
- ☐ The presence of tors and boulders

Select one or more answer choices.

Questions 7 to 9 are based on this passage.

In 1886 approximately 20 percent of United States workers belonged to the Knights of Labor, a labor-activist fraternal order. Nonetheless, soon after reaching this peak, the Knights' membership began a rapid decline, and the organization never regained its national prominence. This collapse had wide-ranging repercussions: subsequent worker organizations took a less active and less broad-based organizational approach. The Knights' defeat demoralized those who championed radical reform and the organization of workers as a class, while empowering those who promoted a less inclusive strategy.

Current scholarship has tended to attribute the Knights' calamitous decline to two factors: persistent tension between skilled and unskilled workers, and fierce opposition from employer associations, which used extralegal means to undermine unions. Voss examined both factors and found that employer associations' opposition, not conflict among the Knights, led to the Knights' rapid decline. But Voss' s account fails to explain why the Knights succumbed so easily when other union movements thrived. It seems that the Knights' particular organizational structure prompted factional disputes among members and, more important, that competition from rival trade and fraternal organizations lured members away. While dissension within the order might not itself have sufficed to cause its demise, the profusion of organizational alternatives during this period induced mass defection, and, subsequently, the

The author would be most likely to agree with which of the following statements about "Current scholarship" ?

- ☐ It underestimates the extent to which the American labor movement was affected by the decline in influence of the Knights of Labor.
- ☐ It tends to downplay the intensity of the tension between skilled and unskilled workers who belonged to the Knights of Labor.
- ☐ It offers a more accurate view of the factors that led to the decline of the Knights of Labor than was offered in earlier scholarship.
- ☐ It tends to characterize the organizational structure of the Knights of Labor in ways that obscure its effect on the organization' s decline.
- ☐ It fails to identify a key factor that accounts for the decline in membership of the Knights of Labor.

Select one answer choice.

Questions 7 to 9 are based on this passage.

- ☐ It fails to identify a key factor that accounts for the decline in membership of the Knights of Labor.

Select one answer choice.

Questions 7 to 9 are based on this passage.

In 1886 approximately 20 percent of United States workers belonged to the Knights of Labor, a labor-activist fraternal order. Nonetheless, soon after reaching this peak, the Knights' membership began a rapid decline, and the organization never regained its national prominence. This collapse had wide-ranging repercussions: subsequent worker organizations took a less active and less broad-based organizational approach. The Knights' defeat demoralized those who championed radical reform and the organization of workers as a class, while empowering those who promoted a less inclusive strategy.

Current scholarship has tended to attribute the Knights' calamitous decline to two factors: persistent tension between skilled and unskilled workers, and fierce opposition from employer associations, which used extralegal means to undermine unions. Voss examined both factors and found that employer associations' opposition, not conflict among the Knights, led to the Knights' rapid decline. But Voss' account fails to explain why the Knights succumbed so easily when other union movements thrived. It seems that the Knights' particular organizational structure prompted factional disputes among members and, more important, that competition from rival trade and fraternal organizations lured members away. While dissension within the order might not itself have sufficed to cause its demise, the profusion of organizational alternatives during this period induced mass defection, and, subsequently, the transformation of the American labor movement.

According to the passage, the rapid decline in the Knights of Labor membership resulted in which of the following?

- ☐ Greater prominence of labor activists who advocated a relatively moderate approach to organizing workers
- ☐ Increasing tensions between labor activists who advocated a broad-based approach to organizing workers and those who advocated a less inclusive approach
- ☐ A decline in the number of workers who regarded labor organizing as an effective means of advancing their interests
- ☐ An increase in the aggressiveness with which employer associations sought to undermine workers' efforts to organize
- ☐ An increase in public concern over the use of extralegal means to undermine workers' efforts to organize

Select one answer choice.

Questions 7 to 9 are based on this passage.

In 1886 approximately 20 percent of United States workers belonged to the Knights of Labor, a labor-activist fraternal order. Nonetheless, soon after reaching this peak, the Knights' membership began a rapid decline, and the organization never regained its national prominence. This collapse had wide-ranging repercussions: subsequent worker organizations took a less active and less broad-based organizational approach. The Knights' defeat demoralized those who championed radical reform and the organization of workers as a class, while empowering those who promoted a less inclusive strategy.

Current scholarship has tended to attribute the Knights' calamitous decline to two factors: persistent tension between skilled and unskilled workers, and fierce opposition from employer associations, which used extralegal means to undermine unions. Voss examined both factors and found that employer associations' opposition, not conflict among the Knights, led to the Knights' rapid decline. But Voss' s account fails to explain why the Knights succumbed so easily when other union movements thrived. It seems that the Knights' particular organizational structure prompted factional disputes among members and, more important, that competition from rival trade and fraternal organizations lured members away. While dissension within the order might not itself have sufficed to cause its demise, the profusion of organizational alternatives during this period induced mass defection, and, subsequently, the transformation of the American labor movement.

The author implies that the "organizations" highlighted in the passage were

- ☐ strengthened by their adoption of the Knights' organizational structure
- ☐ weakened by their separation of skilled from unskilled workers
- ☐ more intent than the Knights had been on achieving radical political reforms
- ☐ more aggressive than the Knights had been in countering the extralegal strategies used by employer associations
- ☐ less committed than the Knights had been to including all workers

In 1960 astronomer Frank Drake used a radio telescope to search for extraterrestrial beings, and ever since, astronomers inspired by Drake have _____ the notion that radio could bridge the gulfs marooning civilizations in space and time.

- ☐ indulged in
- ☐ ridiculed
- ☐ persevered in
- ☐ persisted in
- ☐ emphasized
- ☐ derided

Select two answer choices.

Question 13 is based on this passage.

New methods developed in genetic research have led taxonomists to revise their views on the evolutionary relationships between many species. Traditionally the relatedness of species has been ascertained by a close comparison of their anatomy. The new methods infer the closeness of any two species' relationship to each other directly from similarities between the species' genetic codes.

Which of the following conclusions is best supported by the information?

- ☐ The apparent degree of relatedness of some species, as determined by anatomical criteria, is not borne out by their degree of genetic similarity.
- ☐ When they know the differences between two species' genetic codes, taxonomists can infer what the observable anatomical differences between those species must be.
- ☐ The degree to which individuals of the same species are anatomically similar is determined more by their genetic codes than by such environmental factors as food supply.
- ☐ The traditional anatomical methods by which taxonomists investigated the relatedness of species are incapable of any further refinement.
- ☐ Without the use of genetic methods, taxonomists would never be able to obtain any accurate information about species' degrees of relatedness to one another.

Select one answer choice.

Questions 14 and 15 are based on this passage.

The label "memoir" has been attached by authors and publishers to quite different kinds of writing over the past two centuries. Julie Rak's genealogy of the term in her article "Are Memoirs Autobiography?" highlights the term's radical instability, pointing out that "memoir" has been used to refer both to first- and to third-person narrative; to private and public, unofficial and official, life writing. Notably, literary critics have often conceived "memoir" as a subgenre of "autobiography" and while the basis for this distinction has been somewhat inconstant, the distinction itself has not: "memoir" has been devalued as a minor and subliterary form while "autobiography" has literary status. Recently, however, as interest in memoirs has grown, writers and publishers have outflanked critics: "memoir" is now the prestige term.

The primary purpose of the passage is to

- ☐ identify the origins of a particular distinction
- ☐ describe how the definition of a literary term has changed
- ☐ correct a misunderstanding about a literary genre
- ☐ evaluate competing definitions of a particular kind of writing
- ☐ account for a recent change in literary preferences

Select one answer choice.

Questions 14 and 15 are based on this passage.

The label "memoir" has been attached by authors and publishers to quite different kinds of writing over the past two centuries. Julie Rak's genealogy of the term in her article "Are Memoirs Autobiography?" highlights the term's radical instability, pointing out that "memoir" has been used to refer both to first- and to third-person narrative; to private and public, unofficial and official, life writing. Notably, literary critics have often conceived "memoir" as a subgenre of "autobiography" and while the basis for this distinction has been somewhat inconstant, the distinction itself has not: "memoir" has been devalued as a minor and subliterate form while "autobiography" has literary status. Recently, however, as interest in memoirs has grown, writers and publishers have outflanked critics: "memoir" is now the prestige term.

The author mentions the "article" primarily to

- ☐ show how a particular distinction has become blurred
- ☐ cite an argument that challenges a widespread view
- ☐ demonstrate that a change has occurred over time
- ☐ note an example of a scholarly controversy
- ☐ illustrate a claim about a particular term

Select one answer choice.

$$\ell_1 \parallel \ell_2$$
$$c < 90$$

Quantity A

$$a + b$$

Quantity B

$$b + c$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

n is an integer such that $111 \leq n \leq 114$.

Quantity A

The remainder when n is divided by 31

Quantity B

16

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

In a company, $\frac{2}{3}$ of the employees are women and $\frac{1}{2}$ of the employees are college graduates.

Quantity A

The fraction of the employees in the company who are women college graduates

Quantity B

$$\frac{1}{6}$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

The center of each of the five circles is point O . The radii of the five circles, from smallest to largest, are r , $2r$, $3r$, $4r$, and $5r$, respectively.

Quantity A

The area of the shaded region

Quantity B

The area of the striped region

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

$$(2x - 1)(y - 4) = 0$$

Quantity A

$$xy$$

Quantity B

$$2$$

- ☐ Quantity A is greater.
- ☐ Quantity B is greater.
- ☐ The two quantities are equal.
- ☐ The relationship cannot be determined from the information given.

Select one answer choice.

What is the perimeter of square $ABCD$ if $AC + BD = 14\sqrt{2}$?

- ☐ 28 ☐ $28\sqrt{2}$ ☐ $28\sqrt{3}$ ☐ 56 ☐ 112

Select one answer choice.

The average (arithmetic mean) and the median of the salaries of 5 employees in a certain company were equal until each of the 3 highest salaries was raised by \$400 while the other 2 salaries remained the same. If X is the median and Y is the average (arithmetic mean) of the 5 salaries after the raises of the 3 salaries, then $X - Y =$

- ☐ \$100
- ☐ \$160
- ☐ \$200
- ☐ \$240
- ☐ \$400

Select one answer choice.

For each order of envelopes, a company charges d dollars per box for the first 100 boxes and $\frac{2d}{3}$ dollars per box for any boxes in excess of 100. If the company charges \$660 for an order of 250 boxes of envelopes, what is the value of d ?

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

The closing price of a stock on a certain day was P dollars. For the next 8 consecutive trading days, the closing price changed as follows. For the 1st, 3rd, 5th, and 7th days, the closing price of the stock was 10 percent less than its closing price on the preceding day. For the 2nd, 4th, 6th, and 8th days, the closing price of the stock was 10 percent greater than its closing price on the preceding day. Which of the following represents the closing price, in dollars, of the stock on the 8th day?

- ☐ $4(0.99)P$ ☐ $8(0.99)P$ ☐ $(0.99^4)P$ ☐ $(0.99^8)P$ ☐ P

Select one answer choice.

A value of 16 is 2.5 standard deviations below the mean of the values in a certain data set. Which of the following could be the mean and the standard deviation, respectively, of the values in the data set?

- ☐ 18.5 and 2.5 ☐ 18.5 and 4 ☐ 23.5 and 2.5 ☐ 26 and 2.5 ☐ 26 and 4

Select one answer choice.

Which of the following could be the graph of $y = (x + 2)^2 - 5$ in the xy -plane?

Select one answer choice.

Irene had \$20,000 in savings. She used some of her savings to purchase a computer. Of the amount remaining, she invested 40 percent at 6 percent simple annual interest, and the rest at 10 percent simple annual interest. If Irene's income from the interest totaled \$1,260 for the first year, how much of her savings did she use to purchase the computer?

- ☐ \$3,000
- ☐ \$3,421
- ☐ \$4,000
- ☐ \$5,000
- ☐ \$6,875

Select one answer choice.

If $a = \left(-\frac{1}{37}\right)^{12}$, which of the following equals 37^{-12} ?

- ☐ $-\frac{1}{a}$ ☐ $\frac{1}{a}$ ☐ $-a$ ☐ a ☐ $\sqrt{a}$

Select one answer choice.

The function f is defined by $f(x) = \left((3)(10^8)\right)^x$ for all integers x .

What is the value of $\frac{f(5)}{10^{42}}$?

Enter your answer as an integer or a decimal in the answer box. Backspace to erase.

Number of Books Read	Frequency
0	5
1	4
2	5
3	3
More than 3	3
Total	20

A town library held a reading drive, in which 20 elementary school students were asked to record the number of books they read over the summer. Only whole numbers of books were recorded. The table above shows the results of the reading drive. The average (arithmetic mean) number of books read by the students was 2 books per student.

Which of the following statements individually provide(s) sufficient additional information to conclude that only one student read only 5 books?

Indicate all such statements.

- ☐ Two students read only 6 books each.
- ☐ No student read more than 6 books.
- ☐ No student read only 4 books.
